RA **Ram** 8:14:29 AM
Yes many not use ..I have installed first time

SA **Shibin Ayikal** 8:15:33 AM
I have a question. I have set up a Azure Container Registry. We now want to ensure it's backed up. As of now there is a no direct backup option available for ACR. I am thinking of backing the storage account beneath the ACR just in case . Do you guys have a good backup suggestion for ACR that is seamless and easily tesable.

Niraj Kumar 8:20:45 AM

Why would you back it up? Isn't it maintained and made available by Microsoft? Organize your containers with TAG

Erion S joined group via invite link

Rukhsar Ahmad 8:30:13 AM

Like velocity development... Velocity knowledge sharing... Thanks Niraj

SA **Shibin Ayikal** 8:36:52 AM

Niraj Kumar

Why would you back it up? Isn't it maintained and made avail...

This is a customer requirement. They wanted a way to backup the ACR itself. At this point ACR backup is not maintained. I

have a Microsoft support case opened and they also said that might come in the future.

Niraj Kumar

8:39:25 AM

Shibin Ayikal

This is a customer requirement. They wanted a way to backu...
Where would you back it up? The storage account gives 3 copies for LRS and 6 copies of GRS

To another storage account?

8:39:48 AM

SA

Shibin Ayikal

8:42:30 AM

Yes . I'm thinking of that. But the customer requirement is now more than keeping redundancy. They want point in time restore.

It seems an overkill.

8:43:11 AM

Niraj Kumar

8:47:55 AM

Well in that case the only choice you have to use azcopy to copy it to another blob storage. Schedule azcopy using Azure automation!

SA

Shibin Ayikal

8:48:22 AM

That is a good suggestion. I will try. Thank u..

8:49:33 AM

Not needed but welcome if you want to.

Dear Subscribers,

6:36:27 PM

Thank you for showing interest in "AzureTalk-Learning Azure The Ezy Way"! It's an absolutely free 1-hour weekly recurring session to learn Azure! Following is agenda for this week.

- Time & Date: July 1st, Saturday 9:30 PM EST, Sunday 7:00 AM IST
- Place: Online Skype meeting.
<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>
(<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>)
- Speaker: Niraj Kumar
- Agenda: Azure Networking

What is AzureTalk?

- Weekly recurring 1 hour session to cover wide array of topics on Microsoft Azure.
- Session has 3 parts
 - o 1st part I'll walk you through "Azure Concept Of The Week" by utilizing deck.
 - o 2nd part we do a live demo and implement what we discussed earlier.
 - o 3rd part Q & A session.
- These are live sessions and you will get an opportunity to ask questions. Make full use of time!
- Recorded sessions are published onto our AzureTalk Youtube channel.
- You could also join our Azure Talk Telegram Group for even better experience! Ask questions and get answers from the experts.
- You can refer all past Azure Talk here.

Thanks,
AzureTalk Team!

HV Hello All, this is Hitesh 12:17:30 AM
I am new to Azure. I wish to do its certification. I need your help in learning Azure and certification.

 **Lalit Rawat** 12:33:59 AM
Hitesh Valecha
Hello All, this is Hitesh I am new to Azure. I wish to do its c
Hello hitesh as azure is vast topics which covers almost all the Microsoft services and application. So yo learn azure please make it ur mind in which field u need to go like. Azure administration Iaas, development-PaaS or o365, SharePoint online- SaaS. Which will help your understand azure services and most of time use azure documentations to learn. I ll help u on this to start from beginning.

HV **Hitesh Valecha** 12:34:45 AM
I am into IT Infra project management, and I wish to move to cloud platform
Hello Lalit.. 12:35:42 AM

 **Vivek Kumar Mishra** 12:36:53 AM
Does anyone using Azure mobile app??
I have a question is this possible to add multiple account 12:37:14 AM

 **Lalit Rawat** 12:42:52 AM
Hi hitesh, it's good , so basically you can start ellorbrate what are cloud services or platform , try to relate with you onpremises infra like if you have storage account basically in on-premises it is hdd. Please keep the concept in ur mind and try to understand the components of azure . Then it will be easy

HV **Hitesh Valecha** 12:43:31 AM
Currently I'm project managing a Datacenter migration project to cloud.

 **Lalit Rawat** 12:43:31 AM
If you want u can just take a look of my blog where I have covered some basic topic to understand the azure

You mean one user account per user session!!

Hitesh Valecha

6:29:43 AM

No to IBM Cloud...
Hitesh, we discuss Azure in this forum and IBM cloud.

Hitesh Valecha

6:31:39 AM

Hello All, this is Hitesh I am new to Azure. I wish to do its c
<https://openedx.microsoft.com> (<https://openedx.microsoft.com>)

This is your single source of truth for Microsoft Azure
learning!

6:32:06 AM

Anuj Rana

6:33:22 AM

Niraj Kumar

You mean one user account per user session!!
Correct, just like any other Azure service, be it over browser or
application in same session.

Niraj Kumar

6:34:34 AM

Anuj Rana

Correct, just like any other Azure service, be it over browser o
Yes, but multiple users can hit your service and use separate
sessions

Anuj Rana

6:35:41 AM

Right but using one mobile application on specific device, you can
only login to one account and manage services and resources
linked with it.

You can definitely login with other accounts too but not at the
same time

6:36:13 AM

Azure mobile application allows you to access your linked
subscriptions and tenants. Once can also use cloud shell,
however, only one user can use it at one time.

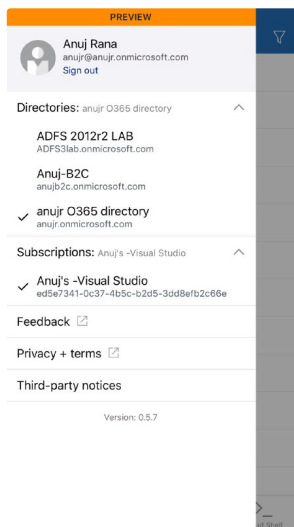

6:37:34 AM

Yes, if they are using different application which created separate
instances.

6:38:59 AM

Like this

6:39:16 AM

6:39:18 AM

So once i am signed in, i will have access to all my resources, but only i can access them unless i sign out and use other account to sign in again to access or manages services liked with different PUID

6:41:45 AM

Another admin can certainly log in at same time on another device or application

6:42:17 AM

But one application supports only one account at one time.

6:42:39 AM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:43:07 AM

Try to see the permission or role access to that subscription

Niraj Kumar

6:43:53 AM

Anuj Rana

You can definitely login with other accounts too but not at the Really! It only allows 1 user session??

Anuj Rana

6:44:55 AM

Niraj Kumar

Really! It only allows 1 user session??

I mean only once user can login at one point of time to this application . Two or more users cannot use the same application on same device at one time

Niraj Kumar

6:46:26 AM

Anuj Rana

I mean only once user can login at one point of time to this app Can I have 2 simultaneous user session from 2 different devices?

Anuj Rana

6:46:46 AM

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

Try to see the permission or role access to that subscription

It only shows what all resources are available for logged in user in this application. Since this application shows u exactly what u see on manage.windowsazure.com (<http://manage.windowsazure.com>) or portal.azure.com (<http://portal.azure.com>)

Niraj Kumar

6:47:00 AM

Can I have 2 simultaneous user session from 2 different devic...

Yes, u should be

Niraj Kumar

6:48:07 AM

That's what I thought

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:52:19 AM

You need to see the configuration on the application

Anuj Rana

6:53:53 AM

Niraj Kumar

That's what I thought

Yes, tested and verified.

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:54:20 AM

You need to see the configuration on the application

?

It shows u all resources to which u have access either due to service or co admin privileges or RBAC

6:54:51 AM

Niraj Kumar

6:55:12 AM

There was a question asked in another group on "create dashboard for messages for logic apps ... "

U can use azure portal to monitor Logic apps as dashboard.

4:25:36 AM

U can also configure logic app to use diagnostics for more rich details n debugging.

Once it's set, u can configure for alerts as well.

This is what I responded ...

4:25:54 AM

U can also leverage the data from storage onto other services like azure Stream Analytics, Power BI or OMS(Operational management suite) to have real time monitoring dashboard.

4:26:13 AM

Your inputs r welcome 🍌

Anyone having idea about azure backup

Yup...Azure recovery vault...for full VM backup...folder level backup in preview

Vivek Kumar Mishra

12:56:23 AM

Question is as per policy retention period is 30 days and is this possible to change it from 30 days to 90 days

And i want to change it for any particular date

12:57:08 AM

And don't want to changes in policy

12:57:22 AM

Lalit Rawat

12:57:41 AM

Vivek Kumar Mishra

And i want to change it for any particular date

U can create the custom retention pol

Policy which will help you to keep ur data for 10 years

12:58:01 AM

Don't chose the default policy . U can create ur own policy

12:58:37 AM

Vivek Kumar Mishra

1:00:01 AM

I am using custom policy

Lalit Rawat

1:00:45 AM

What are the options u r getting over there

Vivek Kumar Mishra

1:00:55 AM

I want to increase the backups retention for one vm not all

Seems like i am not able to ask the question in proper way

1:01:46 AM

Lalit Rawat

1:02:23 AM

Then u can create the new custom policy and apply to this to on the vm u need to apply

Vivek Kumar Mishra

1:04:31 AM

I have a policy in that policy 17 vm added and retention period of that policy 30 days for daily backup, and for one vm yesterday backup i want to make the retention period 90 days

Is this possible??

1:05:05 AM

Lalit Rawat

1:05:25 AM

Yes...

Vivek Kumar Mishra

1:06:04 AM

I don't to change in policy if I changed it 90 days then it will apply all 17 vms

Lalit Rawat

1:06:13 AM

Yes...

How?

Lalit Rawat

1:06:39 AM

Select the perticular vm then click on the backup option after that u ll be get the policy tab on right side. Then create the custom policy

Try this and let me know if u come across any issue

1:07:59 AM

Kiran Prabhu invited Thanveer Ahamed

Kiran Prabhu invited Shikha Nechlani

Miilinnd Patil invited Manoj Rane

Rahul Ambhore

1:11:07 AM

1:41:05 PM

did you have install powershell of azure'

FE

Felipe

1:41:27 PM

Sure I have,also the AD DSC module by running install-module -name xActiveDirectory -force

1:42:15 PM

Vivek Kumar Mishra

1:42:20 PM

Felipe

Got a question regarding nested ARM templates with PowerShell...
Arm module works with ps 5 version

Lalit Rawat

1:43:05 PM

did you try to run import-dscResource command

or did you installed azure active directory powershell correctly

1:43:28 PM

FE

Felipe

1:43:29 PM

You cannot run that command,it's a dynamic keyword

Manjunath S joined group via invite link

FE

Felipe

1:44:04 PM

I am running all of this from Visual Studio with the template and some DSC scripts

Lalit Rawat

1:44:26 PM

ok..

FE

Felipe

1:45:01 PM

Got PS 5.1.1 version

Any idea?

1:46:18 PM

Lalit Rawat

1:47:15 PM

<https://ashleypoole.co.uk/2014/where-is-import-dscresource-in-powershell-dsc/> (https://ashleypoole.co.uk/2014/where-is-import-dscresource-in-powershell-dsc/)

Where is Import-DSCResource In Powershell DSC?
(https://ashleypoole.co.uk/2014/where-is-import-dscresource-in-powershell-dsc/)

try this

1:47:18 PM

Import-DscResource is actually a dynamic keyword which is only available inside a configuration function. That makes it not terribly discoverable, unfortunately, but it's what we've got. If you write an empty configuration and then type Import-DscResource, though, you'll get intellisense / tab completion for its parameters (-ModuleName and -Name)

1:48:35 PM

Shetty Nilesh

1:49:28 PM

check if this helps

<http://setspn.blogspot.in/2015/06/working-with-powershell-dsc-and-azure.html> (<http://setspn.blogspot.in/2015/06/working-with-powershell-dsc-and-azure.html>)

(<http://setspn.blogspot.in/2015/06/working-with-powershell-dsc-and-azure.html>)

setspn.blogspot.co.uk

Working with PowerShell DSC and Azure VM's based on Windows 2012

(<http://setspn.blogspot.in/2015/06/working-with-powershell-dsc-and-azure.html>)

Mostly when I work with Azure VM's I do the actual VM creation using Azure PowerShell cmdlets. I like how you can have some template scripts...

Undefined DSC resource 'xTimeZone'. Use Import-DSCResource to import the resource.

1:49:51 PM

At line:1 char:1

After some googling I found out that the PowerShell prompt imports to module it finds in it's PATH variable. As we are running from an x86 prompt, the folder that was loaded was different. Typically all DSC guides tell you to install DSC resources below C:\Program Files\WindowsPowerShell\Modules but in fact for the Azure PowerShell prompt you need to put them in C:\Program Files (x86)\WindowsPowerShell\Modules or you have to modify

your PATH variable to include the x64 location.... I choose to copy the module to the x86 location:

Before backup apply NSG block internet then try to take backup
Hi Lalit you want me to create a new Vm & install AD on it right

FE **Felipe** 6:18:45 AM
Regarding my question yesterday, was able to edit and deploy the template from the portal but not from VS, still getting the Import-DSCResource....The DSC PS scripts got that line of code already to import xActiveDirectory

I may be missing something to install on my local machine.... 6:19:21 AM

Niraj Kumar 6:20:21 AM

Jijo Varghese

how to create password self service portal in windows AD
Use MIM 2016.

Microsoft identity manager 2016 6:21:45 AM

<https://docs.microsoft.com/en-us/microsoft-identity-manager/working-with-self-service-password-reset>
(<https://docs.microsoft.com/en-us/microsoft-identity-manager/working-with-self-service-password-reset>) 6:21:50 AM

Docs

Working with the Self-Service Password Reset portal
(<https://docs.microsoft.com/en-us/microsoft-identity-manager/working-with-self-service-password-reset>)

([https://docs.microsoft.com/en-us/microsoft-](https://docs.microsoft.com/en-us/microsoft-identity-manager/working-with-self-service-password-reset)

[identity-manager/working-with-self-service-password-reset](https://docs.microsoft.com/en-us/microsoft-identity-manager/working-with-self-service-password-reset))

See what's new with Self-Service Password Reset in MIM 2016, including how SSPR works with multi-factor authentication.

Jijo but this question is not related to Azure.

6:22:33 AM

JV

Jijo Varghese

6:23:17 AM

But It is my Azure VM and I have installed AD on that VM

Niraj Kumar

6:24:11 AM

FE

Felipe

6:24:18 AM

Why MIM?

You can use EMS for Azure AD Premium

6:24:35 AM

Niraj Kumar

6:24:39 AM

For self service password reset for AD users

FE

Felipe

6:25:03 AM

It contains self service password reset and password writeback from AAD to on-premises AD

6:25:06 AM

Niraj Kumar

6:25:09 AM

Felipe

You can use EMS for Azure AD Premium

Yes only if you are syncing identities

Shetty Nilesh

6:25:12 AM

he is not using azure ad...its an ad installed on azure iaas vm

FE

Felipe

6:25:23 AM

Ok

JV

Jijo Varghese

6:25:28 AM

Sir am not using Azure Ad

FE

Felipe

6:25:33 AM

In that case good to go with MIM

JV

Jijo Varghese

6:25:50 AM

Is MIM works with AD on Windws server?

Felipe

FE So you've only migrated your tin to Azure IaaS,correct? 6:26:09 AM

Niraj Kumar

6:27:41 AM

Jijo Varghese

Is MIM works with AD on Windws server?

Yes it's a product from Microsoft and it does way more than sspr

FE

Felipe

6:28:09 AM

I know what it is,was asking about your infrastructure

Sorry,not for me...

6:28:22 AM

"Subscriptions" is ONLY a container for billing purposes mainly...

Rajeev Singh

9:50:47 AM

Conclusion

While Windows Azure contains many useful abstractions, there is no direct equivalent to an "Environment" in the sense used by the typical software team. Any organisation planning a production application on Windows Azure should consider how to best use the Windows Azure abstractions to provide the best mix of flexibility and control for each team and activity.

To summarise:

- Create Billing Accounts based on the organisation's policies for funding projects and lifecycle activities
- Create Subscriptions based on groups of users with shared management requirements
- Create Hosted Services within appropriate Subscriptions for each environment
- Use the "Staging" deployment slot in any environment to enable testing of new deployments without requiring downtime for the existing deployment
- Protect environments by following secure account management practices.

Sharing u above summary

9:50:55 AM

There r multiple answers to it

9:51:20 AM

Let me have a small write up/ case study for the customer

9:51:47 AM

Subscription. A billing account can contain multiple subscriptions. A subscription is essentially a unit of management. When a user has access to a subscription via a Windows Live ID or Management Certificate, they are able to perform any operation within that subscription. As such, a subscription should not be shared for environments with different operational or management requirements.

9:52:14 AM

Lalit Rawat

9:52:27 AM

Rajeev Singh

Is it every time we need to have different subscription for envi
Vms can be moved one subscription to another easily but later on
consumption are more and bill will increase more then 2
department will fight as they have to pay together after all
budging is matter

Rajeev Singh

9:53:12 AM

Example Environment Use

Now that we understand the purpose of each of these abstractions, let's look at how a typical organisation may use these to represent multiple environments for a single application. Note that depending on your requirements you may end up with a solution quite different to this one, but you should be able to use similar thought processes to arrive at a solution that makes sense for you.

The first thing you'll note is that this organisation has chosen to use two different billing accounts. This is because one department is responsible for paying for the development (including testing) of solutions, while another is responsible for ongoing operations of production solutions.

Within the Development billing account, the organisation is using separate subscriptions for Development and Test. This was done because the developers and testers each wanted the ability to manage their own environments. The developers

Rajeev Singh

10:25:12 AM

Answer to the prev. Ques:

Reason to have multiple subscriptions:

Each subscription is billed separately. Enterprises may have multiple departments and each has its own billing policies. As a result each department creates its own subscription. Each subscription can be managed separately. Enterprises may have departments that have different security and compliance requirements. Each department needs to own and manage its own subscription.

10:25:15 AM

1. Each subscription is billed separately. Enterprises may have multiple departments and each has its own billing policies. As a result each department creates its own subscription.

10:25:38 AM

2. Each subscription can be managed separately. Enterprises may have departments that have different security and compliance requirements. Each department needs to own and manage its own subscription.

If your organization maintain an AMS Application management System where each application has an unique id and ownership details you can make use of resource group level tagging to extract azure usage cost per application. This is what I did . I tagged the resource group with appid. Then I exported the resource group along with appid to a file. I also exported the application details to another file. These two files along with the

monthly usage report files are fed to a QlikSense application to get a very granular report wherein usage cost could be shown against every app even if you are using one subscription. You can use PowerBI instead of QlikSense .

Thanks lalit

Shetty Nilesh 1:30:28 AM
NSGs are evaluated independently, and an "allow" rule must exist at both levels otherwise traffic will not be admitted.

For incoming traffic, NSG set at the subnet level is evaluated first, then the NSG set at the NIC level. For outgoing traffic is obviously the converse. 1:30:57 AM

Vivek Kumar Mishra 1:31:52 AM
Ok thanks

Means i need to allow traffic nsg which applied on subnet 1:32:26 AM

how to configure MPLS routing for seamless Express Route experience. Perhaps a step by step instructions or the detail info possible right from discovery till setup and finally into production

1:07:46 PM
- 

Shetty Nilesh

Connecting to an MPLS shouldn't be any different to connecting to a standard network as long as you have a firewall in place? Some MPLS providers force management of the firewall themselves so you may have to ask your provider to configure the remote end and allow the routing.

If you don't have a firewall on the MPLS then you will need to VPN into a site that is connected to it and then use routing to ensure the VPN is available to sites on the MPLS

Niraj Kumar

6:16:05 PM

Renjit Arvind

If I have a subnet with 10.124.1.0/28,I am suppose to get 14 ...
You will get $2^4 - 5 = 11$ Hosts in the network

RA

Renjit Arvind

6:17:13 PM

Shakti Ranjan

6:18:16 PM

Niraj Kumar

You will get $2^4 - 5 = 11$ Hosts in the network
It should 2^8 right?

Niraj Kumar

6:18:54 PM

he has /28 (tg://bot_command?command=28) CIDR which leaves only 4 bits for host

Shakti Ranjan

6:20:25 PM

Ok.. then /24 (tg://bot_command?command=24) and /16 (tg://bot_command?command=16) both leaves 8 ..??

Niraj Kumar

6:21:29 PM

vnet CIDR /24 (tg://bot_command?command=24) and Subnet CIDR /28 (tg://bot_command?command=28) it'll give you 16 subnets and 11 hosts in each subnet.

Shakti Ranjan

6:23:00 PM

Ok.. then /24 and /16 both leaves 8 ..??
Didn't understand! Could you rephrase your question?

Shakti Ranjan

6:24:11 PM

Niraj Kumar

Didn't understand! Could you rephrase your question?

I got it now with just above solution.

Niraj Kumar

6:24:48 PM

Shakti Ranjan

I got it now with just above solution.

Great!

Niraj Kumar

6:25:30 PM

vnet CIDR /24 and Subnet CIDR /28 it'll give you 16 subnets a...

So if you look at wastage of host addresses, it's 5 host address per subnet and you will waste 80 IPs in total.

Shakti Ranjan

6:27:07 PM

Niraj Kumar

So if you look at wastage of host addresses, it's 5 host address

Right...so it is good to go with address space /16

(tg://bot_command?command=16) and subnets /24

(tg://bot_command?command=24). Correct?

and /28 (tg://bot_command?command=28) for Gateway subnet.

6:28:04 PM

Niraj Kumar

6:28:29 PM

yes /28 (tg://bot_command?command=28) is ideal for Gateway subnet

Pedro Perez

6:28:54 PM

If you can spare the addresses you might want to get a /27

(tg://bot_command?command=27) for the GatewaySubnet just in case you go for ER+VPN coexistence in the future

Shakti Ranjan

6:29:42 PM

Pedro Perez

If you can spare the addresses you might want to get a /27 fo...

Ok

Niraj Kumar

6:50:35 PM

Pedro Perez

If you can spare the addresses you might want to get a /27 fo...

Good point abt coexistence!!

Niraj Kumar

7:10:43 PM

Need to revisit Azure Talk timing.

Shakti Ranjan

7:13:38 PM

I have big doubt regarding auto scale in ARM model. For autoscale in ARM the possible way is to go with VM scale set. So suppose I have deployed with configuration min 2 and max. 5 VM' on CPU metrics.

Now at this time 2 VM are running and CPU reached threshold which cause to spin new VM to distribute the load. So here newly spined VM will contain same configuration and code what we have in initial 2 running VM's.

Suppose I have to deploy latest code. So what is the procedure to do it. If I will deploy latest code in 1 VM then it will shink with others.?

Few months back I read somewhere that during creation of VM scale set we need to give image and whenever new VM will spin then it would be use same image. If it is then everytime we need to change image for code deploymentscloud which require downtime..

It's very confusing..please suggest and clear my concept regarding VM scale set or auto scale solution in ARM.

Niraj Kumar

7:15:42 PM

Shakti Ranjan

I have big doubt regarding auto scale in ARM model. For auto...
No experience with VM Scalesets, so will lean on other members.
I'll hold back and do some research.

Shakti Ranjan

7:16:39 PM

No problem

Lalit Rawat

7:19:45 PM

Shakti Ranjan

I have big doubt regarding auto scale in ARM model. For auto...
So basically ur question is how the scaling work in arm

Shakti Ranjan

7:20:01 PM

Right

Niraj Kumar

7:22:08 PM

Autoscaling is supported for WebApp and VM scalsets

In case webapp same code is deployed when new instance is spin up

Lalit Rawat

So basically when you will create the auto scaling in azure u will be adding the min 2 and maximum 5 instance. So when the traffic increase it will create another one using the same image

7:25:46 PM

What u have to do is u have to set the auto scale rule and make sure that will be configured correctly

7:26:40 PM

When if you set the rule when my CPU usage reduces then after 10 to 15 min reduce the instance

7:27:39 PM

Shakti Ranjan

7:31:45 PM

There is no issue in configuration of scale set in Azure. Just want to know how it will work.. currently 2 VM's running and suddenly load increases then more VM's will add as per my rule.

Now is newly added VM's having same code what we have in previously 2 running VM's. If not then if user hits newly created VM then there will be a lack in application

Lalit Rawat

7:32:51 PM

Yes it has same code which is there in 2 VMs otherwise there is no use of auto scaling

Because customers running huge websites or VM which is application critical if it is not supported then what a big organization will use auto scale

7:34:15 PM

So when u'll create the auto scale all the setup has been saved in some blob storage. When VM will auto scale then it will take the latest configuration

7:35:25 PM

So all the VMs have same data

7:35:40 PM

Shakti Ranjan

7:36:17 PM

Lalit Rawat

Because customers running huge websites or VM which is app...

Ok...so suppose I am using scale set in production. Now need to refresh application with new code then I need to deploy this code in one VM or 2 or what?

Vivek Kumar Mishra

7:36:32 PM

What happens if gateway subnet /20 (tg://bot_command? command=20)

Shakti Ranjan

7:36:54 PM

Ok...so suppose I am using scale set in production. Now need...
Chii

Lalit Rawat

7:37:52 PM

One moment, u have to update your code on primary VM or primary application rest will be taken care by scale set

Shakti Ranjan

7:38:27 PM

How to identify which one is primary VM in scale set?

Lalit Rawat

7:39:47 PM

https://blogs.msdn.microsoft.com/cloud_solution_architect/2016/12/29/performing-application-upgrades-on-azure-vm-scale-sets/

Cloud Solution Architect

Performing Application Upgrades on Azure VM Scale Sets

(https://blogs.msdn.microsoft.com/cloud_solution_architect/2016/12/29/performing-application-upgrades-on-azure-vm-scale-sets/)

Virtual Machine Scale Sets (VMSS) are an awesome solution available on Azure, providing autoscale capabilities and elasticity for your application. I...

Shakti Ranjan

7:41:34 PM

In back end Azure using LIFO to add and remove VM's in scale set. But in front end for users I think no way to identify

Lalit Rawat

7:44:28 PM

Shakti Ranjan

In back end Azure using LIFO to add and remove VM's in scale...

let me check , i think yes but not sure

Shakti Ranjan

7:44:47 PM

Yes please check.

And second thing if it is taking any custom image from blob to spin VM's. Then everytime we need to create custom image with latest code. To apply changes in application. That would be very tough if organisation giving release twice in a week or weekly and downtime also will be there.

7:53:00 PM

Lalit Rawat

7:54:32 PM

i don't think so MS will allow this to downgrade there market provide this type of scenario. because that will be the best scenario for business continuity

because there is no use for scale in and scaleout

7:55:33 PM

Shakti Ranjan

7:57:17 PM

Lalit Rawat

i don't think so MS will allow this to downgrade there market price
This is worst solution for autoscale in ARM as per my views.

Lalit Rawat

7:57:41 PM

ok..but any how that is not possible.

Shakti Ranjan

8:00:26 PM

Hmmm...I will look into it and try to get concept behind it.

2:10:38 AM

Thanks

now what to do

2:10:46 AM

Lalit Rawat

2:15:14 AM

give me min

Noor Khan

2:15:38 AM

for e.g let say i have once domain controller in my lab machine, for learning purpose if i want to move that AD in azure cloud is that possible, but i dont have any public IP with me

Lalit Rawat

2:16:07 AM

it is not

Noor Khan

2:16:40 AM

hhhhmmm ok

Lalit Rawat

2:17:14 AM

u have to extend to extend the ad to azure VM server or user azure ad connect to migrate ur user to azure..

restart the DNS Server service:

2:17:47 AM

1.On the DNS server, start Server Manager. To start Server Manager, click Start, click Administrative Tools, and then click Server Manager.

2.In the console tree, expand Roles, expand DNS Server, and then expand DNS.

3.Right-click the DNS server, click All Tasks, and then click Restart.

Noor Khan

2:18:10 AM

for thaqt i will be required one public IP right

Lalit Rawat

2:18:11 AM

did you assign the static ip on azure vm

or dns

2:18:14 AM

Noor Khan

2:18:41 AM

no i had not

Lalit Rawat

2:18:42 AM

Noor Khan

for thaqt i will be required one public IP right
not required

k

2:18:48 AM

A question to the professionals on this group. Company A has an Azure AD P1 subscription and is looking to synchronise On premise AD with Azure AD by implementing SSO with pass through as there are NO ADFS servers on premise. The 2 questions I have are: 1. Can users use password self service feature offered by AAD P1 to reset the password for on premise account while away from the network? 2. Will creating a new user account on premise create the AAD account also?

Shetty Nilesh 6:05:44 AM
The SSPR feature will only work for accounts in Azure tenant...and not for those in on-prem unless password write back is enabled...

ES **Erion S** 6:07:31 AM
Is write back feature available in AAD P1 and will it work In SSO Pass through scenario since on premise AD is the authority source in this case?

Shetty Nilesh 6:07:57 AM
Anyone here has experience migrating non-microsoft workloads to Azure...such as Websphere/DB2 on RHEL...

Microsoft Azure Interview Questions Azure Networking – VNET

This section will cater to some example questions where Hybrid implementation is the key focus of Azure deployment.

15. An application front end is hosted on Azure but due to security reasons customer want database to be hosted on-premises within his office building. What are the different ways to handle this connectivity scenario in Azure? Looking at the requirement of connecting single on premises DB machine to Azure hosted application, Azure VNET based "Point to Site" can be considered as correct choice in this scenario for Azure to on premises connectivity. Point to Site is ideal choice for establishing VPN connectivity between on premises resources and Azure resources where number of resources to be connected is limited.

16. What are the other VNET options for achieving connectivity with on premise and azure resources? Site to Site and express route are other options for achieving cross premises connectivity. Site to site to specifically use when you have large number of resources to be connected. In some cases, Site to Site or Point to Site connectivity may introduce network latency as VPN created by these features work on public infrastructure (Internet) only. To overcome on this situation "Express Route" option can be taken which offers dedicated Leased Line based offering to overcome on latency issue.

17. What is the option to connect on premises Database in case user is not willing to open up VNET based connectivity? In such case, a WCF service can be developed and hosted on premises. This WCF service will have CRUD operations specifically against the on premises database. Then Service bus relay option can be used for invoking on premises WCF service from Azure hosted web application to access the database. Use of WCF and service bus relay will avoid the option of VPN connectivity using Azure VNETs offerings.

Microsoft Azure Interview Questions Azure Networking – VNE...

Point no. 17 is called hybrid connection manager. Microsoft replaced WCF version with WebSocket opensource protocol and new HCM makes use of Azure relay bus. The HCM need to installed on prem and an outbound internet connection is required on port 80 and 443. It only supports TCP connections and no support for UDP connections. Also it doesn't support all Services.

<https://docs.microsoft.com/en-us/azure/app-service/app-service-hybrid-connections> (https://docs.microsoft.com/en-us/azure/app-service/app-service-hybrid-connections)

12:09:16 PM

Because of the dedicated hardware you need to run vdi and the license cost will be lower, also because of the flexibility we have within azure for downgrading/upgrading recources.

Also our client does not want the hassel of changing harware every 5years, migration cost ect... so think the azure/rds

12:13:28 PM

solution is good in this case, they only use office and some cloud apps.

Lalit Rawat

12:14:31 PM

Jo S

Also our client does not want the hassel of changing harware...
Yes that will be the good solution for long term only for application

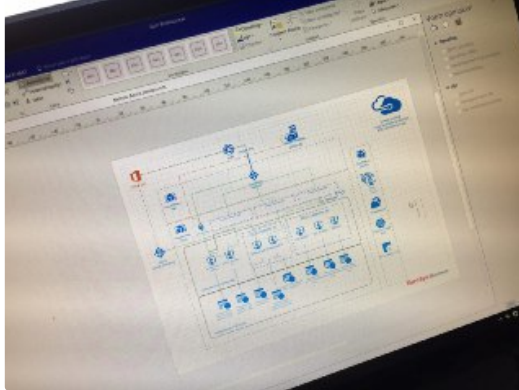

U have to buy the terminal licence based on ur user

12:15:04 PM

Jo S

12:27:23 PM

Docs

Azure Active Directory B2C: Custom Policies

(<https://docs.microsoft.com/en-us/azure/active-directory-b2c/active-directory-b2c-overview-custom>)

A topic on Azure Active Directory B2C custom policies

Niraj Kumar

1:25:05 AM

Shetty Nilesh

The ability to add custom identity providers is in public preview
Yes B2C is the replacement of ACS

Shetty Nilesh

1:25:13 AM

nope

Azure AD is a replacement of ACS

1:25:31 AM

1:25:38 AM

Niraj Kumar

1:25:47 AM

Azure AD B2C i meant. :)

Shetty Nileshe

1:25:57 AM

yep

B2C is a part of the identity experience focused on social identity providers for end consumers...

1:26:55 AM

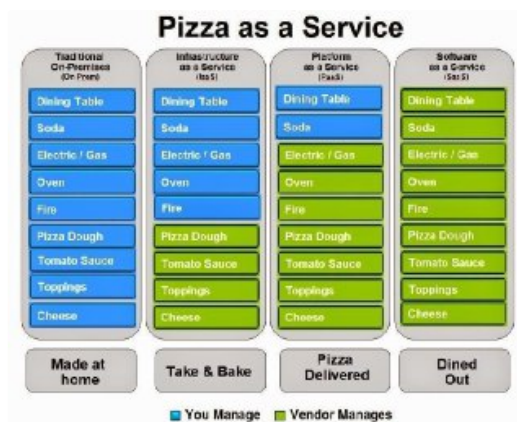

in few months we will most likely see a new feature that will be a combination of B2B and B2C...

1:28:34 AM

DK

Diwakar Kumar

1:30:51 AM

Very nicely explained... About IaaS, PaaS, SaaS

Shetty Nileshe

1:30:52 AM

as there are few shortcomings with both and many customers need a product which offers a combined feature set of these products...and its necessary too if MS has to compete with products such as Gigya...B2C and B2B atm are way behind compared to them...

Niraj Kumar

1:33:07 AM

I thought Ping, Octa and Azure AD are only 3 leaders in IdaaS magic quadrant published by Gartner.

**Azure AD makes the leaders quadrant in Gartner's 2017
Magic Quadrant for Access Management!**
([https://blogs.technet.microsoft.com/enterprisemobility-
ad-makes-the-leader-quadrant-in-gartners-2017-
magic-quadrant-for-access-management/](https://blogs.technet.microsoft.com/enterprisemobility/2017/06/12/azure-s-the-leader-quadrant-in-gartners-2017-magic-quadrant-for-access-management/))

Howdy folks, I have great news to share with you today!
Gartner released their 2017 Magic Quadrant for Access
Management (AM MQ), which shows that Mic...

**Gartner Gives Gigya The Highest Score for the B2C Use
Case in IDaaS - Gigya**
([http://www.gigya.com/resource/analyst-
report/gartner-report-critical-capabilities-identity-
access-management-service-worldwide/](http://www.gigya.com/resource/analyst-report/gartner-report-critical-capabilities-identity-access-management-service-worldwide/))

Gigya is the leader in customer identity management. Learn
more on our Gartner Gives Gigya The Highest Score for the
B2C Use Case in IDaaS page.

Niraj Kumar

1:36:26 AM

It's use case score but they haven't made it to magic quadrant
yet

That's review of users

1:36:53 AM

on gartner website

1:36:56 AM

Are they startups? 1:37:51 AM

Good document explaining Azure for AWS folks.

Rohit Mehta joined group via invite link

Niraj Kumar via @bold

2:00:03 AM

hello

Rukhsar Ahmad

2:22:06 AM

Niraj Kumar

Identity provider's list he is referring to. So I assume he has
Yes Niraj this is correct. We have custom STS.. Which get IDPs
from Azure ACS and redirect to IDP sso login page. Azure ACS is
deprecated already so we want to move Azure B2C.

Shetty Nileshe

2:25:20 AM

The ability to add custom identity providers is in public preview
Thanks Nileshe..we will go through link

SA

Salman

9:23:11 AM

Hi Team, can you plz share script to start azure vm?

Niraj Kumar

9:23:55 AM

Q. What is Azure Key Vault?

A. Azure Key Vault is a service in Azure which provides a resource that is backed by Hardware Security Modules (HSMs) which provide the gold-standard in

protection and anti-tampering of secure data. Azure Key Vault supports three types of data

- **Secrets** - These are values that are 25KB or less that are written to and read from. They have individual ACLs enabling registered applications to have access but not the actual developer. A good use would be storing passwords, SQL connect strings, access keys etc
- **Keys** - These are written to key vault but cannot be exported out. Used as part of encryption, hash generation etc and the key can be configured (HSM-protected) to never leave the HSM even when used and instead the cipher operations required are sent to the key vault service and the result returned. Again full ACL on a per-key level
- **Certificates** - Stored in the HSM and full lifecycle possible

By using Key Vault you can securely store data and avoid having these sensitive pieces of information stored in source code which may then be compromised.

Salman

9:24:50 AM

Hi Team, can you plz share script to start azure vm?

It's available in Azure automAtion gallery. Start and stop both

9AM EST

11:06:23 PM

Vivek Kumar Mishra

11:12:14 PM

Is there a limit on the size of each data source being backed up?

There is no limit on the amount of data you can back up to a vault. Azure Backup restricts the maximum size for the data source, however, these limits are large. As of August 2015, the maximum size for a data source for the supported operating systems is:

S.No	Operating system	Maximum size of data source
1	Windows Server 2012 or later	54,400 GB
2	Windows 8 or later	54,400 GB
3	Windows Server 2008, Windows Server 2008 R2	1700 GB
4	Windows 7	1700 GB

The following table explains how each operating system is supported. [FEEDBACK](#)

SA

Salman

12:34:50 AM

Team, created a vm on azure .. and can rdp from broadband but when in corporate cannot rdp. we have only 443 port enabled. what all options to achieve rdp access?

Vivek Kumar Mishra

12:36:43 AM

3389

Enable

12:37:33 AM

If not then you use vpn

12:38:01 AM

*then

12:38:11 AM

If not both then maybe rdgateway

12:38:56 AM

Jagan CR

12:39:10 AM

In most of the corporate RDP is blocked over public, so U SHOULD use Vpn

Yes RD gateway as well

12:39:30 AM

Vivek Kumar Mishra

12:43:09 AM

Salman

Team, created a vm on azure .. and can rdp from broadband...

If money not matters then use express route

Just kidding

just my two cen ...is there chances we change rdp port at local
Yo
- Its arm or asm vm 1:34:53 AM
-  **Lalit Rawat** 1:35:17 AM
Yes it is
-  **Vivek Kumar Mishra** 1:35:42 AM
For arm create load balance and define front end pool 443 and backend 3389
- And try to take rdp ip:443 1:35:56 AM
-  **Lalit Rawat** 1:36:19 AM
Salman
just my two cen ...is there chances we change rdp port at local
Same as in azure and make sure there are nag rule allow to his
-  **Vivek Kumar Mishra** 1:36:25 AM
It will work
-  **Niraj Kumar** 1:36:39 AM
Salman
Team, created a vm on azure .. and can rdp from broadband ...

Create a P2S vpn from your laptop to vnet where vm is hosted

Vivek Kumar Mishra

1:37:31 AM

For arm create load balance and define front end pool 443 an...
Yes it can work with External load balancer

Salman

1:38:22 AM

Team, created a vm on azure .. and can rdp from broadband ...
You can also use RDS web gateway

Vivek Kumar Mishra

1:39:53 AM

Lb is good option

Vpn n Rds take much time and configuration

1:40:22 AM

Right??

1:41:07 AM

But for security which one is best option???

1:41:25 AM

recovery/site-recovery-overview)

Provides an overview of the Azure Site Recovery service, and summarizes deployment scenarios.

Amit Charungoo

2:40:31 AM

the error is about Template validation

I am trying to deploy it with both

2:40:46 AM

JR

Jagadeesh Rs

2:40:53 AM

Does any one have a sample for Azure api oauth and calling Micro service sample's

Amit Charungoo

2:41:18 AM

using powershell from ISE

JR

Jagadeesh Rs

2:41:23 AM

Amit Charungoo

the error is about Template validation

It will show error during validation Also..

Amit Charungoo

2:41:45 AM

as well as Visual studio

JR

Jagadeesh Rs

2:41:51 AM

Just click the notification when it says deployment started

Amit Charungoo

2:41:55 AM

yes I checked it

JR

Jagadeesh Rs

2:42:02 AM

It will show detailed error

Amit Charungoo

2:42:28 AM

but is it possible to find out the issue in Visual Studio

from the code itself

2:42:44 AM

JR

Jagadeesh Rs

2:42:58 AM

It is difficult in vs

Why can't you try calling PowerShell ise

2:43:20 AM

Amit Charungoo

2:43:40 AM

I am trying to use powershell ise

there O have a powershell script 2:43:57 AM

which is supposed to initiate the deployment 2:44:16 AM

through template 2:44:24 AM

JR **Jagadeesh Rs** 2:44:24 AM

Ya I understand..

 **Amit Charungoo** 2:44:41 AM

but it seems to be a headache

JR **Jagadeesh Rs** 2:44:48 AM

But what I am saying use PowerShell to do everything

One more deployment 2:44:56 AM

There is a template deployment option available in portal itself 2:45:19 AM

Try doing that instead from Vs 2:45:30 AM

 **Amit Charungoo** 2:45:34 AM

but it looks easy to create a JSon template in VS

JR **Jagadeesh Rs** 2:46:06 AM

Once it is success then try with vs

 **Amit Charungoo** 2:46:10 AM

portal is good but I am looking for options outside portal

I am building a UI tool for Azure management 2:46:35 AM

JR **Jagadeesh Rs** 2:46:50 AM

Have you tried run book..

Ok 2:47:02 AM

 **Amit Charungoo** 2:47:02 AM

that's why I am trying for all the options

no I haven't tried run book 2:47:27 AM

JR **Jagadeesh Rs** 2:47:35 AM

Check that

You can import PowerShell there 2:47:48 AM

Create webhook to trigger 2:47:58 AM

 **Denis tr3x** 2:49:06 AM

Vivek Kumar Mishra

This size increased upto 4 TB

thanks for the info, but I can't find it in the documentation, could you please help me with reference link?

<https://medium.com/@ericjwhuang/oauth-within-public-api-a...>
Thanks I will check

SG **Suresh Guntha** 3:09:21 AM
Hello All,

Any powershell or cli comments to break the azure blob lease?

Shetty Nilesh 3:10:35 AM
there is a script here...check if it helps...<https://gallery.technet.microsoft.com/scriptcenter/How-to-break-the-locked-c2cd6492>
(<http://gallery.technet.microsoft.com/scriptcenter/How-to-break-the-locked-c2cd6492>)
Microsoft
Script How to break the locked lease of blob storage in Microsoft Azure (PowerShell)
(<https://gallery.technet.microsoft.com/scriptcenter/How-to-break-the-locked-c2cd6492>)
This PowerShell script sample shows how to break the locked lease of blob storage in Windows Azure.

SG **Suresh Guntha** 3:11:03 AM
Let me check...thx

Shetty Nilesh 3:12:07 AM
it should have both asm as well as arm version

Vivek Kumar Mishra 3:12:10 AM
Shetty Nilesh
there is a script here...check if it helps...<https://gallery.technet.microsoft.com/scriptcenter/How-to-break-the-locked-c2cd6492>
If it's add to vm in that case it will also break the lease??

Shetty Nilesh 3:12:17 AM
or else use <https://azure.microsoft.com/en-in/resources/samples/storage-blobs-powershell-break-locked-lease/?cdn=disable> (<https://azure.microsoft.com/en-in/resources/samples/storage-blobs-powershell-break-locked-lease/?cdn=disable>)

(<https://azure.microsoft.com/en-in/resources/samples/storage-blobs-powershell-break-locked-lease/?cdn=disable>)
Microsoft
How to break the locked lease of blob storage by ARM in Microsoft A... (<https://azure.microsoft.com/en-in/resources/samples/storage-blobs-powershell-break-locked-lease/?cdn=disable>)

in/resources/samples/storage-blobs-powershell-break-locked-lease/?cdn=disable)

Azure Sample: This sample demonstrates how to break the locked lease of blob storage by ARM in Microsoft Azure

no it has to be used for orphaned blobs... 3:14:05 AM

Vivek Kumar Mishra

3:14:29 AM

Ok

Not possible for attached one? 3:14:41 AM

Right 3:14:45 AM

Shetty Nilesh

3:15:02 AM

shouldnt be...i havent tried though

Vivek Kumar Mishra

3:16:29 AM

Obviously not possible

But using storage explorer you can copy running vm disk in same storage account 3:16:57 AM

But not in different accounts 3:17:18 AM

Any idea how it's work 3:17:28 AM

SG

Suresh Guntha

3:18:25 AM

I don't have any vms holding that that can be deleted completely with out ant depency but I see its in leased state so not able to delete

Lalit Rawat

3:19:38 AM

Vivek Kumar Mishra

Obviously not possible

just fo copy form azure storage container

Vivek Kumar Mishra

3:19:57 AM

It will take time to remove the lease details form blob

Lalit Rawat

3:20:16 AM

yes

SG

Suresh Guntha

3:20:59 AM

It's more than a week that i have deleted the vm but still blob in lease

Vivek Kumar Mishra

3:22:23 AM

In that case use powershell

SG

Suresh Guntha

3:34:19 AM

Fixed it thx

There is option in storage explorer to break the lease 3:34:58 AM

Noor Khan

3:35:36 AM

Hello mishra, after blocking the internet through NSG, i had schedule a backup at 1:00 pm IST, should i will face any issue or i will get error or do i need to to notice any difference in bcakup

Vivek Kumar Mishra

3:48:59 AM

Shetty Nilesh

shouldnt be...i havent tried though

You can do the same break the running vm lease as well

Guess what after break lease you lost vm connection

3:52:40 AM

Amar Singh

4:21:51 AM

Can we extend the data disk ?

SG

Suresh Guntha

4:21:52 AM

I have no vm associated with it so not an issue for me

Amar Singh

4:24:18 AM

Can any one help me to extend data disk for azure classic vm

Vivek Kumar Mishra

4:33:48 AM

For arm you can

Asm shutdown the vm

4:34:02 AM

Goto disk

4:34:05 AM

If the disk size option highlighted then you can

4:34:27 AM

Amar Singh

4:36:51 AM

Thanks Mishra ji

Any useful link ?

4:37:11 AM

Lalit Rawat

4:37:51 AM

Amar Singh

Any useful link ?

Which drive

Amar Singh

4:38:38 AM

If i extend the additional data disk

Vivek Kumar Mishra

4:38:46 AM

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/expand-os-disk>
(<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/expand-os-disk>)

Docs

Expand the OS drive of a Windows VM in an Azure

(<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/expand-os-disk>)

(<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/expand-os-disk>)

Expand the size of the OS drive of a virtual machine using Azure Powershell in the Resource Manager deployment model.

Lalit Rawat

4:38:59 AM

OK attached the empty disk

Amar Singh

4:39:00 AM

Its having sql database

Vivek Kumar Mishra

4:39:10 AM

In link you can select the option os or data disk

Amar Singh

4:39:35 AM

After exteding disk data will remain the same right

Lalit Rawat

4:39:37 AM

The go diskmgmt.msc and select the disk add the other disk in to in

Create the dynamic disk

4:39:57 AM

Not mbr

4:40:03 AM

Vivek Kumar Mishra

4:40:27 AM

Lalit Rawat

Create the dynamic disk

Dynamic???

Why

4:40:29 AM

Lalit Rawat

4:40:35 AM

Yes

Jagan CR

4:40:49 AM

Lalit Rawat

And would be mater boot record which has is disk so it is not recommended

4:41:18 AM

Vivek Kumar Mishra

4:41:49 AM

Suppose I have two disk E n F and if increased the size of F using portal and want to extend E drive in that case need to use dynamic option

Lalit Rawat

4:41:54 AM

U have to add emapty disk in portL

Yes

4:42:10 AM

Vivek Kumar Mishra

4:42:16 AM

Or if extended the E drive and then simply extend the drive

Lalit Rawat

4:42:33 AM

Yes u goted

Vivek Kumar Mishra

4:42:36 AM

May dynamic create problems

Lalit Rawat

4:42:55 AM

No

Jagan CR

4:43:26 AM

You have to add nee disk then go to os..select disk you wana extend then click extend

New disk will show up --select that and click finish

4:43:55 AM

Don't need to convert to dynamic

4:44:27 AM

Vivek Kumar Mishra

4:45:12 AM

Lalit can you please explain differences between normal extend and dynamic

Lalit Rawat

4:45:14 AM

When u enable the disk which option u ll choose

Vivek Kumar Mishra

4:45:38 AM

I have done normal extend and no data loss

Lalit Rawat

4:45:52 AM

Super cool

Vivek Kumar Mishra

4:45:53 AM

With dynamic data will lost or there

Lalit Rawat

4:45:56 AM

Mishra ji

No 4:46:01 AM

 **Jagan CR** 4:46:13 AM
Yeah there wont be any data loss. I have done it many times

 **Lalit Rawat** 4:46:20 AM
It will allow to add the other volume

Me to 4:46:26 AM

 **Jagan CR** 4:46:48 AM
Lalit Rawat
It will allow to add the other volume
Correct

 **Vivek Kumar Mishra** 4:47:46 AM
Lalit Rawat
Mishra ji
curiosity hai bas

 **Jagan CR** 4:48:29 AM
Vivek Kumar Mishra
Lalit can you please explain differences between normal exten...
Dynamic you can not revert back...but extend you can shrink the disk again(resize)

 **Lalit Rawat** 4:48:42 AM
Vivek Kumar Mishra
curiosity hai bas
Very nice

Always u have lesson to earn 4:48:57 AM

Learn 4:49:04 AM

 **Jagan CR** 4:50:34 AM
If my answers are sme tym could be silly - don't mind frndz.....m learning

Azure vm support nested virtualisation

5:01:11 AM

5:01:14 AM

Amar Singh

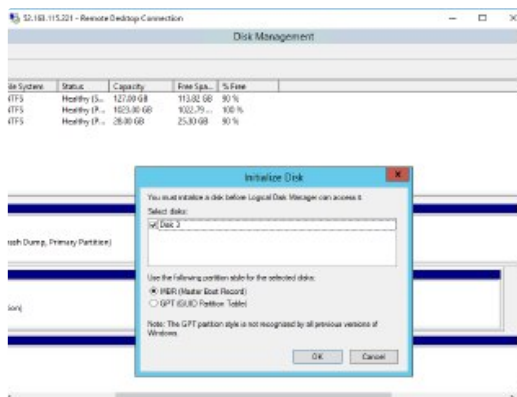

5:42:33 AM

just added one extra disk

getting new option

5:42:39 AM

5:42:40 AM

what should i select

5:42:59 AM

MBR

5:43:02 AM

	or gpt	5:43:10 AM
	Vivek Kumar Mishra MBR	5:43:41 AM
	Then it will display in unallocated disk	5:44:20 AM
	Goto disk which need to extend right and then extend	5:44:46 AM
	Amar Singh i did GPT	5:44:51 AM
	:{(5:45:00 AM
	Vivek Kumar Mishra No idea GPT	5:45:21 AM
	I always used MBR records	5:45:36 AM
	Let's senior person answer on tho	5:45:53 AM
	Noor Khan	5:46:10 AM
	Amar Singh MBR	
	IN MBR it support till 2 TB	
	IN GPT you can use more then 2 TB	5:46:36 AM
	Vivek Kumar Mishra Is it??	5:47:29 AM
	Amar Singh extended disk size but its converted to dynamic disk	5:56:08 AM
	Vivek Kumar Mishra	5:58:03 AM
	Amar Singh extended disk size but its converted to dynamic disk 👉yo	
	Jagan n lalit already explain about it	5:58:35 AM
	Amar Singh thx	6:00:36 AM
	i just gone through	6:00:48 AM
	thx all	6:01:04 AM
	Alex Nezhinskiy	6:24:30 AM
	Vivek Kumar Mishra MBR	
	ransomware Petya.A dont infected if GPT use	

Vivek Kumar Mishra

6:35:55 AM

GPT support dispart cmd??

Ransomware uses diskpart cmd at backend. Right?

6:36:26 AM

Jagan CR

6:41:28 AM

Vivek Kumar Mishra

GPT support dispart cmd??

Yes Gtp support disk part

MBR -use it for OS DISKS

9:49:51 AM

Rukhsar Ahmad

We are using classical cloud service -web roles . how can we i
Logging tk classic portal select the vm and u ll see the option in
down attached disk ,add the emapty disk on this . Logging in to

the vm open the diskmgmt.msc from command prompt . Enable the disk from left pane and create the new volume disk and click the highlighted disk extend

U can add up to 1023 tb disk 9:50:12 AM

Rukhsar Ahmad 9:52:04 AM

Lalit we are not creating VM when we publish cloude service it automatically create VM behind screen

Lalit Rawat 9:52:53 AM

No need to create but u can add the disk un it

Do u have access to that vm or it is showing in ur classic portal 9:53:42 AM

Rukhsar Ahmad 9:54:29 AM

I have rdp to cloud servcie

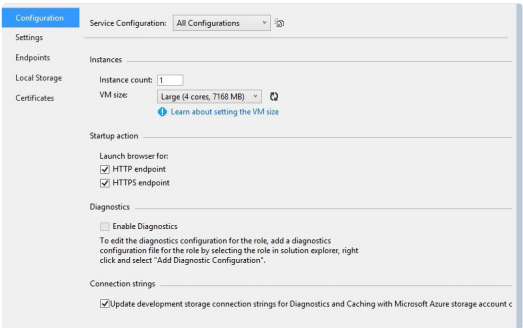

Lalit Rawat 9:54:49 AM

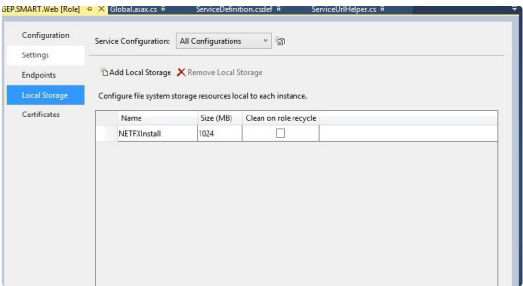

OK..

Rukhsar Ahmad 9:55:01 AM

config

Localstorage config

Lalit Rawat 9:56:01 AM

OK click on local storage

Rukhsar Ahmad 9:56:09 AM

do you think? we can do through configuration.

Lalit Rawat 9:56:20 AM

Add local storage

See what option u r getting I think we will make it from three 9:56:55 AM

Vivek Kumar Mishra

12:39:36 PM

Shibin Ayikal

Hello guys, Have anybody tagged a resource group using AR...
You can tag resource apply policy in Resource group

You want to tag resource group using arm templates??

12:40:06 PM

How you doing this??

12:40:18 PM

SA

Shibin Ayikal

12:41:07 PM

Vivek Kumar Mishra

You want to tag resource group using arm templates??
Yes sir

Niraj Kumar

12:41:41 PM

Vivek Kumar Mishra

You want to tag resource group using arm templates??
Could you really tag a resource group itself??

SA

Shibin Ayikal

12:42:49 PM

Yes. You can do that from the portal and powershell, but so far no luck with the arm script. It would be really helpful if I can do that..

Niraj Kumar

12:43:02 PM

Or you want to tag all resources in a resource group?

SA

Shibin Ayikal

12:43:17 PM

Resource group

Niraj Kumar

12:43:26 PM

You mean JSON script

SA

Shibin Ayikal

12:43:32 PM

Yes sir

Niraj Kumar

12:43:38 PM

Aah

So you want to tag it at the deployment time when deploying using Json

12:44:32 PM

Vivek Kumar Mishra

12:44:46 PM

Niraj Kumar

Could you really tag a resource group itself??
Heard first time i am testing it's possible or not

In a Hub and spoke model...

Use NVA in Hub and transit outbound traffic from Spoke to this NVA out to internet

Shetty Nilesh

1:40:05 PM

Depends on what your requirement is...using a combination of nva and in-built security features with Azure such as NSG and exposing only the required ports and services...

Niraj Kumar

1:40:06 PM

This is centralized model. Another approach decentralized model where you will have NVA in each Spokes.

Centralized approach has benefits of Ease of operational management and control but then you will incur traffic charges for peering

1:40:42 PM

Shetty Nilesh

1:41:00 PM

@suresh here u can go

2:41:09 PM

Vivek Kumar Mishra

2:44:47 PM

I think option removed my MS sometime back

Niraj Kumar

2:45:43 PM

I have liveid

- With my organization id 2:46:03 PM
-  **Lalit Rawat** 2:46:11 PM
Mishra me to
-  **Vivek Kumar Mishra** 2:46:29 PM
But you created long back
-  **Niraj Kumar** 2:46:44 PM
Yeah 8 months back
-  **Vivek Kumar Mishra** 2:46:58 PM
Have you created this id in last 6-7 month??
-  **Suresh Mallela** 2:47:23 PM
Vivek Kumar Mishra
But you created long back
now i am not able to create it. create a ticket with Microsoft to see the possibilities but, want to check with in group :)
- i have my org id created yesterday. now looking for to create a live id with the same account. 2:47:50 PM
-  **Niraj Kumar** 2:51:11 PM
Earlier if I logged to Azure portal with org id it would ask personal or work but now it straight away takes me to my organization federation end point
-  **Lalit Rawat** 2:58:27 PM
Suresh Mallela
now i am not able to create it. create a ticket with Microsoft t
u can ask ur subscription adming to add your account in azure.
u ll recevie the invite and then u ll be able setup ur account. 2:58:57 PM
this other way to setup the orginazation account 2:59:13 PM
-  **Vivek Kumar Mishra** 2:59:40 PM
<https://signup.live.com/?uaid=adfde5a4c72f4ab8a11cce24d55f6682&lic=1>

3:47:08 PM

I am getting an error message while trying to enable replication using ASR. "Push installation to the source machine failed with error code EP0865. Either the source machine is not running, or there are network connectivity issues between the process server and source machine". I have enabled Port 443 between my target servers and process servers. Is there any other ports that need to be enabled.

Lalit Rawat

3:48:05 PM

Shibin Ayikal

I am getting an error message while trying to enable replication
R u trying to enable the replication on vm

SA

Shibin Ayikal

3:48:23 PM

yes.

Lalit Rawat

3:49:10 PM

OK then do something install the mobility service agent manually

Vivek Kumar Mishra

3:49:38 PM

Able to ping target from source?

Lalit Rawat

3:49:57 PM

On this machine and allow print and wmi services on local firewall which comes in application allow

Did you complete the prerequisite of asr

3:51:13 PM

SA

Shibin Ayikal

3:51:48 PM

Lalit Rawat

OK then do something install the mobility service agent manually...
I tried installing it manually with an admin help. It's failing at "performing registration".

Vivek Kumar Mishra

3:51:54 PM

Refresh process server then then try to push again and user name n password is valid or expired?

Lalit Rawat

3:52:07 PM

Did you configur the asr with proxy server

SA

Shibin Ayikal

3:52:20 PM

Lalit Rawat

Did you configur the asr with proxy server
Yes.

Lalit Rawat

3:52:36 PM

That is the problem

Did you ask customer to allow azure site as part of prerequisite

3:53:12 PM

And port open to azure data center

3:53:28 PM

SA

Shibin Ayikal

3:54:01 PM

Lalit Rawat

And port open to azure data center
I think tha'ts missed.

Lalit Rawat

3:54:15 PM

Let's do that

SA

Shibin Ayikal

3:54:21 PM

I will check on that.

Lalit Rawat

3:54:47 PM

Ok

SA

Shibin Ayikal

3:55:03 PM

Vivek Kumar Mishra

Refresh process server then then try to push again and user n...
Username and pwd is valid. I did try refreshing that.

Thanks Lalit and Mishra

3:55:27 PM

Recovery (<https://docs.microsoft.com/en-us/azure/site-recovery/site-recovery-prereq>)

This article summarizes prerequisites for replicating VMs and physical machines to Azure using the Azure Site Recovery service.

use this link to complete and follow step by step

3:56:13 PM

SA

Shibin Ayikal

3:56:20 PM

Is there any Port other than Port 443 that need to be opened between the process server and target server

Lalit Rawat

3:56:30 PM

if not then it ill be proble.

yes

3:56:31 PM

on customer firewall as well

3:56:42 PM

just follow the step-by step.. for this configure i have wroked for almore 40hr without sleep..

3:57:34 PM

make sure customer has to complete all the things. they don't have more than 1TB drive on system otherwise it will fail

3:58:22 PM

Vivek Kumar Mishra

3:58:53 PM

Lalit you know funny part

SA

Shibin Ayikal

3:58:59 PM

Lalit Rawat

make sure customer has to complete all the things. they don't... They are less than 1TB.

Vivek Kumar Mishra

3:59:22 PM

Customer asked i need D as it is after migration

I done lots of googling

3:59:38 PM

Then come to know all i need to enable San policy online

4:00:01 PM

Lalit Rawat

4:00:02 PM

Vivek Kumar Mishra

Customer asked i need D as it is after migration
take the backup and restore it after migration

Vivek Kumar Mishra

4:00:03 PM

Lalit Rawat

using the backup vault

4:00:11 PM

Vivek Kumar Mishra

Lalit Rawat

using the backup vault

Big task

4:00:22 PM

Lalit Rawat

Vivek Kumar Mishra

Big task

yup..

4:00:40 PM

Vivek Kumar Mishra

Then need it during test failover to test application function

4:00:42 PM

SA

Shibin Ayikal

Vivek Kumar Mishra

Then come to know all i need to enable San policy online
Mishraji where will you do that?

4:01:32 PM

Vivek Kumar Mishra

On prim vm

4:01:45 PM

Goto diskpart

4:01:53 PM

Bring San police online

4:02:05 PM

SA

Shibin Ayikal

I see .

4:02:17 PM

4:02:26 PM

Vivek Kumar Mishra

It will create vm as it is make temp drive the last available letter

4:02:43 PM

SA

Shibin Ayikal

Good to know that.

4:03:16 PM

Lalit Rawat

Vivek Kumar Mishra

Bring San police online

if we don't have SAN policy

4:04:02 PM

Vivek Kumar Mishra

then no idea, I think it's windows feature

4:04:43 PM

Lalit Rawat

hahahah

4:05:09 PM

not sure check it and updae me

4:05:47 PM

Shakti Ranjan

4:10:49 PM

How to create a live id using my org account email id.?
We've removed the option now. If it's a verified tenant domain on
MSFT, you can't register any Organization IDs under that tenant
as a Live ID.

Vivek Kumar Mishra

5:15:07 PM

Okies

ketvinism

5:15:56 PM

We've removed the option now. If it's a verified tenant domai...
But why??

ketvinism

5:16:49 PM

Vivek Kumar Mishra

But why??
It used to create a lot of confusions when customers had their
IDs registered both as Organization and Live, and their

Organization configures SSO, etc.

ketvinišmš

5:17:05 PM

It used to create a lot of confusions when customers had their I
It was based on customer feedback mostly.

And also better access management

5:17:27 PM

Vivek Kumar Mishra

5:17:59 PM

But why??

Is there any specific reason you need it?

ketvinišmš

5:18:21 PM

Is there any specific reason you need it?
You could use your outlook or Hotmail id.

Vivek Kumar Mishra

5:19:20 PM

ketvinišmš

Is there any specific reason you need it?
Nope i am just asking reason behind this change

Shakti Ranjan

5:19:34 PM

Niraj Kumar

You will have to accept the invitation
Done.

ketvinišmš

5:19:51 PM

Vivek Kumar Mishra

Nope i am just asking reason behind this change
Yeah, it was driven by Customer Experience and feedback.

Niraj Kumar

5:22:51 PM

Shakti Ranjan

Done.

Okay thanks checking

Shetty Nilesh

11:11:39 PM

Niraj Kumar

I've Forest1 syncing identity to Azure AD and now I'm buildin...

You mean pull identities from one forest and then sync it back to another with password write back?

Why would you want to do that? I dont think its possible... 11:12:11 PM

Niraj Kumar

11:13:11 PM

Yes, I want to pull identities back fromm Azure AD along with password hash to forest no. 2.

Customer can allow access to It's Azure AD but not to it's own forest. 11:13:32 PM

hence this exercise 11:13:37 PM

Shetty Nilesh

11:18:52 PM

well its almost like a forest migration which i dont suppose would be this simple and supported

although AAD Connect supports multiple forests topology 11:20:32 PM

<https://docs.microsoft.com/en-us/azure/active-directory/connect/active-directory-aadconnect-topologies>
(<https://docs.microsoft.com/en-us/azure/active-directory/connect/active-directory-aadconnect-topologies>) 11:22:08 PM

Amit Charungoo

it's the most private cloud to be ever

1:09:04 AM

Thank you guys..

1:09:32 AM

the feature I loved the most is its fabric controller which gives the Azure Stack an ability to self heal

1:10:28 AM

Amit Charungoo

the feature I loved the most is its fabric controller which give
Nice, started learning for. You amit

AH

1:13:52 AM

You manage an Azure virtual network environment for a company that has an office in Boston. The company plans to open a new office location in Paris.

You must replicate the Boston virtual network environment in Paris.

How should you complete the relevant Azure PowerShell commands? To answer, drag the appropriate Azure PowerShell segment to the correct location. Each Azure PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Your answer is **correct**.

Correct answer:

Answer Area	
Boston office	Paris office
Get-Azure/NetConfig	Export-Profile
Get-Azure/NetSite	ConfigurationPath
	C:\Config\Networking\Telepresence\net...
	C:\Config\Networking\Telepresence\net...

so I believe the below question has an invalid answer it should be set-azurevnetconfig , to import it to the destination new subscription ,, correct ?

1:14:10 AM

Second I do apologize if posting I am newbie in azure and tomorrow I have the exam ^_^

5:25:01 AM

difference between Basic and Standard VM

Lalit Rawat

5:26:20 AM

Basic vm are the one which has lower configuration they will not support nlb . They might be slow during configuration of vm

Standard vm are the vm that has higher configuration with new hardware there performance are good. U can change the instance sizing on it but not in basic vms

5:27:56 AM

Noor Khan

5:29:04 AM

difference between Basic and Standard VM

When u just saw the vm configuration u ll understand. Basic vm are not supported ssd drive but standRd support

Noor Khan

Vivek Kumar Mishra

6:47:54 AM

Is there any way to bring up generalized vm

Lalit Rawat

6:48:53 AM

Vivek Kumar Mishra

Is there any way to bring up generalized vm

U need in azure?

Vivek Kumar Mishra

6:49:04 AM

Yes

Lalit Rawat

6:49:53 AM

Elaborate more.

Vivek Kumar Mishra

6:50:05 AM

I have vm, generalized that vm to create image

Now I want to bring up that vm

6:50:22 AM

6:50:26 AM

Any possibility

6:50:32 AM

Lalit Rawat

6:50:37 AM

Yes

Vivek Kumar Mishra

6:50:45 AM

How

Lalit Rawat

6:51:24 AM

Copy that vm to azure container and run the sysprep on this system

Try imaging with this image

6:51:38 AM

Vivek Kumar Mishra

6:52:00 AM

I already copied the reg file

Lalit Rawat

6:52:25 AM

Copy that vm to azure container and run the sysprep on this s...

No idea about it

Lalit Rawat

6:52:54 AM

Not reg file

Now u have vm or server on premises and u want to move it to azure right

6:53:22 AM

Vivek Kumar Mishra

6:53:41 AM

No no

I have vm in azure

6:53:51 AM

Lalit Rawat

6:53:59 AM

Ok

Vivek Kumar Mishra

6:54:13 AM

On that I have done this

Lalit Rawat

6:54:19 AM

Vivek Kumar Mishra

I have vm in azure

Got confused

See in which container that vm is

6:54:37 AM

Go to that storage account and image the vm from.disk

6:55:04 AM

RA

Renjit Arvind

6:56:03 AM

Posting it one more time...

One question... What will be the impact when Root domain (parent child domain structure) is implementing ADFS/ADconnect as part of the AD consolidation where one of the child domain is trying to extend AD to Azure using ADFS/AD connect to Azure as a separate effort for IAAS deployment...?

Niraj Kumar

7:07:11 AM

Renjit Arvind

Posting it one more time... One question... What will be the imp

You mean you have 2 Aad connect one for child forest and one for parent forest? It's supported.

Noor Khan

7:09:01 AM

Renjit Arvind

Posting it one more time... One question... What will be the imp as per my knowledge microsoft recommended not to install ADF & AD CONNECT in domain controller

for that you need a seperate memeber server

7:09:17 AM

Renjit Arvind

RA I am not sure... it seems like there is a separate effort coming up for AD consolidation and AD extending... so wanted to know .. 7:09:18 AM

Yes..theoretically..it will be two connection... 7:10:16 AM

Another question... I haven't extended the AD to Azure but created accounts in Azure AD as part of subscription creation. Can I use this account, to build the IAAS infra including a DC deployment? 7:19:33 AM

 **Niraj Kumar** 7:20:25 AM

Renjit Arvind

Another question... I haven't extended the AD to Azure but cr...
No

You can use it to provision the resource in Azure however you can't use it to operate the iaas vms 7:21:41 AM

Niraj Kumar
Photo

Ohh ok.. Iet me check one more time in azure ad for my confirmation

RA

Renjit Arvind

7:45:41 AM

So even if you wanted to extend your AD by placing a DC in the Azure ... you need Ad to extended to Azure using AD connect?

Lalit Rawat

7:46:14 AM

Renjit Arvind

So even if you wanted to extend your AD by placing a DC in t...
No

U can create the vm and install the add services join in to domain

7:46:44 AM

It's just how we do it in on premise

7:47:19 AM

RA

Renjit Arvind

7:47:49 AM

Join as a additional DC to your domain?

Lalit Rawat

7:47:59 AM

Then u have migrate over the fsmo roles global catalog and other services

Renjit Arvind

7:48:13 AM

Join as a additional DC to your domain?

Correct

RA

Renjit Arvind

7:50:34 AM

Since it is part of IAAS, we don't have domain accounts, which account would be used to deploy this VM..?

Vivek Kumar Mishra

Local

7:51:02 AM

At first time

7:51:08 AM

7:51:31 AM

RA

Renjit Arvind

7:51:42 AM

Can pls share a doc

Vivek Kumar Mishra

7:51:54 AM

I am just reading conversations

RA

Renjit Arvind

7:53:11 AM

Lalit Rawat

7:53:35 AM

Renjit Arvind

Since it is part of IAAS, we don't have domain accounts, which...
When u create the vm it will ask to provide the username and password. Just like deploying image in on-premise we provide the administrator account

Once u'll join it to dc the. U can use ur domain credential

7:54:12 AM

RA

Renjit Arvind

8:03:28 AM

So correct me if I am wrong... initially start with the subscription account and deploy a VM in the VNET (which is an extension of your network connected via Express Route). Add the domain services to that VM and promote as part of your on-premise AD as an additional DC. Any of these steps, we don't need to extend our AD to Azure...

Lalit Rawat

8:16:56 AM

Renjit Arvind

So correct me if I am wrong... initially start with the subscription
Correct I will share the docs I'm in the way to office

and pc simultaneously

9:04:41 AM

Lalit Rawat

9:05:16 AM

Yes

SA

Shibin Ayikal

9:24:52 AM

Hello All, I have an java application hosted in Azure Container Services on top of Kubernetes. Note: the application is NOT based on Azure App Service. In order to run scheduled jobs I am thinking to propose creating a dummy Azure web app and then create a webjob to trigger the ACS based app. Does that make any sense?

I am forced to think of an alternative as Cronjob option in Kubernetes is still in alpha. Also will Azure Scheduler service fit into this case.

Veresh Jain

9:30:36 AM

Shibin Ayikal

Hello All, I have an java application hosted in Azure Container
You can consier using quartz which is Java based job scheduler and ship along with your Java based application

If quartz is not an option then you can go with creating Azure Web app and then create a web job to trigger that webapp

9:31:31 AM

SA

Shibin Ayikal

9:32:43 AM

Veresh Jain

If quartz is not an option then you can go with creating Azure...
Thanks Veeresh, Is quartz free for Enterprise use?

Veresh Jain

9:33:55 AM

Shibin Quartz is shipped under apache license <http://www.quartz-scheduler.org/overview/license.html> (<http://www.quartz-scheduler.org/overview/license.html>)

www.quartz-scheduler.org

License (<http://www.quartz-scheduler.org/overview/license.html>)

A full-featured, Java-based, In-process job scheduler.

Niraj Kumar

9:34:28 AM

Amit Charungoo

recovery-large-disks/)

Microsoft

Azure Site Recovery now supports large disk sizes in Azure (<https://azure.microsoft.com/blog/azure-site-recovery-large-disks/>)

Azure Site Recovery (ASR) now supports the disaster recovery and migration of on-premises virtual machines with disk sizes of upto 4 TB to Azure.

Cool new feature addition to ASR. Now it supports storage space vm backup on Windows 2016.

How Does #Microsoft (tg://search_hashtag?hashtag=Microsoft) #Azure (tg://search_hashtag?hashtag=Azure) Guarantee 99.99% SLA's on a Single Instance Virtual Machine with PREMIUM STORAGE underhood ? Note: 99.99% SLA is On VM Connectivity! Conditions: - The underlying storage for VM OS & Disks should be PREMIUM only. [IOPS: Premium storage would guarantee you the higher IOPS of 50,000/Disk than STANDARD of 500 IOPS/Disk which] [Through-Put: Premium Storage offers 2 GBPS/Disk] What Azure changed to bring the magic: Azure use to place Compute (VM) and Storage Disks (VHD's) far in different DC's now they placed, the Premium Storage Disks (VHD's) in the same DC, on the same server the Compute (VM) resides, which will avoid 'East-West Traffic Issue', Avoiding so-called Network Connectivity Issues BUT DO NOT BE SO CONFIDENT just use VM Scale Set's to have multiple VM instances instead of the only one which would make your app Reliable and 99.99% Available

How Does MS Azure Guarantee 99.99% SLA's on a Single Instance Virtual Machine ?
Note: 99.99% SLA is On VM Connectivity !

Conditions:

- The underlying storage for VM OS & Disks should be PREMIUM only.
- [IOPS: Premium storage would guarantee you the higher IOPS of 50,000/Disk than STANDARD of 500 IOPS/Disk which]
- [Through-Put: Premium Storage offers 2 GBPS/Disk]

What Azure changed to bring the magic:
Azure use to place **Compute (VM)** and **Storage Disks (VHD's)** far in different DC's now they placed the **Compute (VM)** and **Storage Disks (VHD's)** in the same DC, on the same server the **Compute (VM)** resides, which will avoid 'East-West Traffic Issue', Avoiding so-called Network Connectivity Issues

BUT DO NOT BE SO CONFIDENT
just use VM Scale Set's to have multiple VM instances instead of only one which would make your app Reliable and 99.99% Available

Renjit Arvind

9:49:16 PM

Question on ASR ? Can we change the IP and hostname at the
DR site while using the ASR. Or do we need to keep the same
name...pls suggest...

Vivek Kumar Mishra

9:50:19 PM

You can change the ip and host name as well after failover

It's depends upon on you application dependencies

9:50:50 PM

RA

Renjit Arvind

9:57:27 PM

While using ASR, how do we change the journals?

Hostname

9:57:38 PM

Vivek Kumar Mishra

9:58:19 PM

You can but after failover

During replication you can nor

9:58:44 PM

*not

9:58:59 PM

RA

Renjit Arvind

10:03:01 PM

If that is the case, do we have any link to share

Vivek Kumar Mishra

10:03:47 PM

It's simple after failover it will create vm login into that vm
change hostname

It will take a reboot

10:03:52 PM

Let me search

10:03:56 PM

RA

Renjit Arvind

10:08:04 PM

Sure ...by the way thank you for the suggestion..

Docs

Viewing and Modifying Hostnames

(https://docs.microsoft.com/en-us/azure/virtual-network/virtual-networks-viewing-and-modifying-hostnames)

How to view and change hostnames for Azure virtual machines, web and worker roles for name resolution

10:09:17 PM

Modifying a hostname

You can modify the host name for any virtual machine or role instance by uploading a modified service configuration file, or by renaming the computer from a Remote Desktop session.

Next steps

- [Name Resolution \(DNS\)](#)
- [Azure Service Configuration Schema \(.csfsg\)](#)
- [Azure Virtual Network Configuration Schema](#)
- [Specify DNS settings using network configuration files](#)

FEEDBACK

One more thing when you are doing failover there is option to change vm display name on azure portal this value will not change your host name host name will pick same as on prim vm

10:13:31 PM

Renjit Arvind

10:19:31 PM

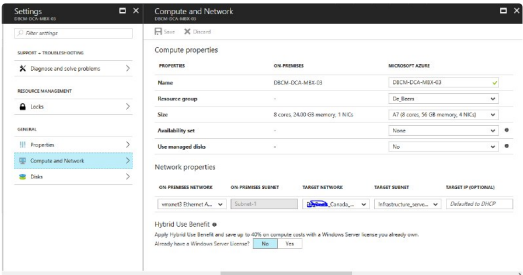

Oh...so what will change when opt for name change during the failover

Vivek Kumar Mishra

10:20:05 PM

Only the display name in portal

10:24:57 PM

here you can see the option of VM name

10:25:10 PM

you can change the Microsoft Azure Name but hostname as it is on-prim VM 10:25:59 PM

RA **Renjit Arvind** 10:42:52 PM
Will it same for Azure to Azure fail over...can you plz check?

 **Vivek Kumar Mishra** 10:45:16 PM
Azure to Azure need some time to check

RA **Renjit Arvind** 10:47:24 PM
Pls check.. I will wait.. ...This is for a questionnaire..

JV	Jijo Varghese Thnaks Lalit.Let me check this	5:22:40 AM
	Lalit Rawat Jijo Varghese Thnaks Lalit.Let me check this Sure ,basically it is integrating through application proxy authentication.	5:26:38 AM
RA	Renjit Arvind Thank you Misra.. I assume if I wanted rename the host name.. I might need to use the earlier article. Is it?... can you plz let me know..whether process would be same like VMware to Azure migration..?	6:29:45 AM
	Vivek Kumar Mishra Still i am confused	6:33:48 AM
	You are trying on prim to Azure or Azure to Azure?	6:34:05 AM
	For both you can change the host name after failover	6:34:27 AM
	Process is same	6:34:36 AM
	Do failover the. It create the vm login in that vm change host name	6:35:09 AM
	Reboot server to apply effect	6:35:24 AM
	Anuj Rana Renjit Arvind To deploy AD connect, do we need ADFS..? If answer is no, c... You do not need ADFS for it, federation is only required to provide SSO for claim aware relying parties. You do have option to install ADFS through AAD connect but its upto you if you need it or not. You can use AAD connect to only sync ur users to cloud with or without password hash.	7:19:25 AM
	Lalit Rawat Renjit Arvind Thank you Misra.. I assume if I wanted rename the host nam... Rename is not allowed in azure after vm created or during migration before migration u can try	7:21:50 AM
RA	Renjit Arvind I wanted to try from Azure to Azure...	7:25:26 AM
	Vivek Kumar Mishra Lalit Rawat Rename is not allowed in azure after vm created or during mi... he is asking about host name	7:26:36 AM

	I have done many times	7:26:45 AM
	Shakti Ranjan Host name we can change but not display name.	7:27:34 AM
	Vivek Kumar Mishra Renjit Arvind I wanted to try from Azure to Azure... Changing host name process is same	7:27:40 AM
	Lalit Rawat Vivek Kumar Mishra he is asking about host name One doubt if we change the host name how would be we change the services name associated with vnsh host.	7:28:21 AM
	Vivek Kumar Mishra Shakti Ranjan Host name we can change but not display name. You can change display name as well for that you need to delete the vm and recreate it again	7:28:30 AM
	Lalit Rawat If not then when u took an rdp it will reflect the same I have long back but did not work for me	7:29:22 AM
	Shakti Ranjan Yes it is only possible after deletion and recreation in ARM. But in ASM you can change host name as well with export and import of configuration.	7:29:58 AM
	Lalit Rawat Vivek Kumar Mishra You can change display name as well for that you need to del... That mean u r creating the new vm using the same diak	7:30:10 AM
	Disk	7:30:12 AM
	Vivek Kumar Mishra Lalit Rawat That mean u r creating the new vm using the same diak Right	7:30:50 AM
	I didn't have idea about services that Part will take care by application team	7:31:16 AM
RA	Renjit Arvind Getting confused... so can we change the host name /display (tg://bot_command?command=display) name of the VM after or	7:31:29 AM

during the failover ... similar to onprem to Azure. Vmware we can change the display name as servername-test ...

Shakti Ranjan

7:32:12 AM

Renjit Arvind

Getting confused... so can we change the host name /display ...
Yes it is possible... downtime required.

RA

Renjit Arvind

7:33:37 AM

Why the downtime...can't we do it while fail over...

Vivek Kumar Mishra

7:34:09 AM

Renjit Arvind

Getting confused... so can we change the host name /display ...
During test failover there is option to change the display name in azure portal

But it will pick the same name as source vm

7:34:28 AM

That can change after failover

7:34:40 AM

Lalit Rawat

7:34:46 AM

Renjit Arvind

Getting confused... so can we change the host name /display ...
I think so yes because any how u ll be creating the new vm

Vivek Kumar Mishra

7:35:26 AM

But it will pick the same name as source vm

True that is the beauty of ms azure

Change the hostname in on premises and resync it again

7:35:59 AM

Vivek Kumar Mishra

7:36:30 AM

Lalit Rawat

Change the hostname in on premises and resync it again
That will take time

RA

Renjit Arvind

7:36:45 AM

No change on Prem... This is DR for prod...

You can't do that...

7:36:53 AM

Vivek Kumar Mishra

7:37:21 AM

Best way is change it after failover

RA

Renjit Arvind

7:37:29 AM

Thank you Anuj for ADFs

Mishra only the display name..Correct..

7:37:56 AM

RA

Renjit Arvind

7:39:05 AM

Else using the DiSK create a VM with a different name

Vivek Kumar Mishra

7:39:18 AM

Ahh

Let me explain again

7:39:25 AM

Laltu plz correct if something wrong

7:39:37 AM

When you add you vm in replication

7:39:53 AM

RA

Renjit Arvind

7:40:00 AM

Sorry buddy... I appreciate your efforts...

Yes

7:40:04 AM

Lalit Rawat

7:40:20 AM

Yes

Vivek Kumar Mishra

7:40:27 AM

It will take the host name and display name same as source vm

RA

Renjit Arvind

7:40:35 AM

Yes

Vivek Kumar Mishra

7:40:50 AM

During failover you can change the display name not host name

RA

Renjit Arvind

7:41:09 AM

Ok...

Vivek Kumar Mishra

7:42:05 AM

After failover onece vm create login into vm and change hostname

RA **Renjit Arvind** 7:42:21 AM
Ok...

 **Lalit Rawat** 7:42:23 AM
When u add your vm for replication there are terrain services are associated with it when u ll do fail over they will look for sane hostname as u have repliCated if u change that might fail over effect

Vivek Kumar Mishra 7:43:01 AM
After failover onece vm create login into vm and change host...
Mishra ji fir wahi baat bahar kuch or andar kuch or ye kese chalega

RA **Renjit Arvind** 7:43:34 AM
English plz....

 **Vivek Kumar Mishra** 7:43:39 AM
Bahar ke se koi effect ni hota hai

Ok vm display name and hostname 7:43:51 AM

Bother are different 7:43:58 AM

No dependency 7:44:05 AM

 **Shakti Ranjan** 7:44:07 AM
Vivek Kumar Mishra
Bahar ke se koi effect ni hota hai
Correct

 **Lalit Rawat** 7:44:07 AM
Vivek Kumar Mishra
Ok vm display name and hostname
Yes

 **Vivek Kumar Mishra** 7:44:08 AM
Why??

Because when you doing test failover it will create vm display name your vmname - test 7:44:47 AM

With same host name as on prim 7:44:56 AM

 **Lalit Rawat** 7:45:17 AM
But if some has deleted that vm mistakenly as not it is in right name what will be the impact

 **Vivek Kumar Mishra** 7:46:32 AM
Lalit Rawat
But if some has deleted that vm mistakenly as not it is in right

That is different things here we are discussing about host and display name during failover

Lalit Rawat

7:46:44 AM

But if some has deleted that vm mistakenly as not it is in right
Maar khayega wo phir 🙄🙄🙄🙄

Shakti Ranjan

7:47:05 AM

Lalit Rawat

But if some has deleted that vm mistakenly as not it is in right
Don't give access to those people who don't have Knowledge on this

Vivek Kumar Mishra

7:47:48 AM

Lalit Rawat

But if some has deleted that vm mistakenly as not it is in right
That's why lock in place

Lalit Rawat

7:48:17 AM

Vivek Kumar Mishra

That's why lock in place
I goted

7:48:27 AM

Ranjit try in test env and be happy u ll see the difference

7:49:52 AM

Vivek Kumar Mishra

7:50:29 AM

Today morning i did that Azure to Azure

Awesome and very simple

Viewing and Modifying Hostnames

(<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-networks-viewing-and-modifying-hostnames>)

How to view and change hostnames for Azure virtual machines, web and worker roles for name resolution

Use full

7:51:36 AM

Vivek Kumar Mishra

7:53:31 AM

Renjit you query clear or still confused??

RA

Renjit Arvind

7:53:34 AM

So let me summarize..in a Azure to Azure fail over process..

1) We can change the host display name after the failover but not the actual host name.

2) If you have to change the actual host name- use the disk create a new VM. Else after the failover- login to the server and rename it... Application which are specific with the journals may have an impact...

3) If you wanted to change the journals, we can follow the above article and do it from the servicebus side... This article will be applied irrespective of the situations.. pls review...

How to change the Azure VM name.

(<https://community.spiceworks.com/topic/989360-how-to-change-the-azure-vm-name>)

Hi Team,

We have hosted 2 VM's in Azure with the name of

GDAZDAKGERDC01, GDAZDAKGERDEV1, Now i have to change both the names.

Renjit Arvind

7:55:01 AM

So let me summarize..in a Azure to Azure fail over process.. 1)

8:03:10 AM

Lalit Rawat

New name

Counter question using disk hostname same. But using image
hostname different or same?

Lalit Rawat

8:06:00 AM

Renjit Arvind

Proper Generalised meaning

Run the sysperp before creating the image

RA

Renjit Arvind

8:06:34 AM

Got it ...Thank you..

Lalit Rawat

8:06:57 AM

Vivek Kumar Mishra

Counter question using disk hostname same. But using image...

looks like same but can be different

Vivek Kumar Mishra

8:08:18 AM

Yup

Shakti Ranjan

8:09:12 AM

Vivek Kumar Mishra

Counter question using disk hostname same. But using image...

If you delete VM without Vhd and use that Vhd to deploy VM host name is same. Before creating image run sysprep and then create image and deploy VM using that image then new name.

Vivek Kumar Mishra

8:09:32 AM

Shakti Ranjan

If you delete VM without Vhd and use that Vhd to deploy VM ...

If I create image without running sysprep

8:10:24 AM

Sorry all to asking many questions

8:10:36 AM

Shakti Ranjan

8:11:04 AM

Image in the place to deploy large no. of workloads. Could you imagine all workloads with same name?

Vivek Kumar Mishra

8:11:50 AM

Why are you giving ana like azure docs???

Shakti Ranjan

8:12:13 AM

Vivek Kumar Mishra

Why are you giving ana like azure docs???

??

Vivek Kumar Mishra

8:12:20 AM

Yes I want to deploy many vm with same host name

Shakti Ranjan

8:12:44 AM

Then capture and deploy

Vivek Kumar Mishra

8:12:55 AM

Lalit you there??

Shakti Ranjan

8:13:51 AM

Then capture and deploy

Yo 🙌

Lalit Rawat

8:14:25 AM

Vivek Kumar Mishra

If I create image without running sysprep

Y can but it is not recommended by Microsoft

Vivek Kumar Mishra

8:15:08 AM

Lalit you there??

Yes

Vivek Kumar Mishra

8:16:26 AM

Yes I want to deploy many vm with same host name

How this is possible , if every company name will same then
maruti selling with name of audi

Shakti Ranjan

8:16:45 AM

Lalit Rawat

How this is possible , if every company name will same then ...

Lalit Rawat

8:16:51 AM

There is restrictions on naming convention

Vivek Kumar Mishra

8:16:52 AM

Lalit Rawat

Y can but it is not recommended by Microsoft

Bro who follows ms recommendations create your own

Lalit Rawat

8:17:20 AM

Sure

Vivek Kumar Mishra

8:17:43 AM

Lalit Rawat

How this is possible , if every company name will same then ...

Think other way as well audi will sell multiple A3 with same colour

Shakti Ranjan

8:17:47 AM

Vivek Kumar Mishra

Bro who follows ms recommendations create your own

Mishra Ji ...if you will not run sysprep then VM will not lose their
identity.

Vivek Kumar Mishra

8:18:11 AM

Shakti Ranjan

Mishra Ji ...if you will not run sysprep then VM will not lose t
Chup kar ja tu run kar lunga bhai

I have question regarding vm uid

8:18:29 AM

Lalit Rawat

8:18:34 AM

Vivek Kumar Mishra

Chup kar ja tu run kar lunga bhai

Vivek Kumar Mishra

Can we change it custom way

8:18:55 AM

Lalit Rawat

8:18:58 AM

Today is great discussion going on

Shakti Ranjan

8:19:06 AM

Vivek Kumar Mishra

Can we change it custom way
Means?

Lalit Rawat

8:19:23 AM

Today is great discussion going on

Vivek Kumar Mishra

8:21:07 AM

After recreating vm this id will change application having register
license using uid

I can I replace new uid with new one

8:21:34 AM

Shakti Ranjan

8:25:56 AM

Ok..let me explain this with example.

You creating an image without sysprep then it is like one backup
you have at that point of time. You can't use this image to deploy
no. of VM's where you want different host name. However
Microsoft not recommending to create image without sysprep.

Image means you have VM you installed all required softwares
and all then do sysprep and deploy no. of VM's with same
configurations and with different name.

Vivek Kumar Mishra

8:28:18 AM

Shakti Ranjan

Ok..let me explain this with example. You creating an image wit
Everyone working out of box no deployed their infa using proper
ms recommendations

And it is true

8:28:25 AM

Shakti Ranjan

8:29:15 AM

Vivek Kumar Mishra

Everyone working out of box no deployed their infa using pro...
That is different case. But you can't propose anything to
management which is not recommended by MS.

Vivek Kumar Mishra

8:29:42 AM

Bye

Shakti Ranjan

8:29:57 AM

Vivek Kumar Mishra

8:30:12 AM

Shakti Ranjan

8:34:24 AM

One key point to be noted.

Capture- Including all data disks and OS disk.

Snapshot- Only that particular disk.

i want to shutdown machine on 8pm to 7 am during the wee...

Here possible ways are to do it.

First- Create automation account and use default runbook to start and stop VM's.

Second- Use script to do it.

Third and easiest way- Expand that VM in Azure portal go to automation tab and scheduled for what you want.

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 11:03:12 AM

Shakti Ranjan

Here possible ways are to do it. First- Create automation account you can use the OMS to make that solution

5:23:55 AM

Hi Team,

I have ON Dc & Mailserver which is a LAB MACHINE

5:24:20 AM

I want to move that both machine in Azure for practise & learning purpose

5:24:40 AM

can you guide m how to do it

5:24:52 AM

i dnt have any public IP or VPN tunnel

5:25:08 AM

Vivek Kumar Mishra

5:33:35 AM

Noor Khan

i dnt have any public IP or VPN tunnel

you have internet connection on test machine first thing you need internet connection

Noor Khan

5:33:58 AM

yes

Noor Khan

6:09:10 AM

What this error says

6:09:14 AM

BA

Balachandran

6:13:13 AM

192.168.1.0/24 (<http://192.168.1.0/24>) subnet not comes address space 192.168.0.0/24 (<http://192.168.0.0/24>)

Instead use 192.178.0.0/26 (<http://192.178.0.0/26>) or 28 according to your requirement

6:14:08 AM

*192.168.0.0/26 (<http://192.168.0.0/26>)

6:15:18 AM

Noor Khan

6:16:20 AM

then also same error

Add Spc is :- 192.168.0.0/26 (<http://192.168.0.0/26>)

6:16:36 AM

Subnet Add is :- 192.168.1.0/24 (<http://192.168.1.0/24>)

6:16:51 AM

or /26 (tg://bot_command?command=26) same

6:17:09 AM

BA

Balachandran

6:17:45 AM

Subnet 192.168.0.0/26 (<http://192.168.0.0/26>)

Noor Khan

6:18:11 AM

why i cant use 192.168.1.0 (<http://192.168.1.0>)

BA

Balachandran

6:18:16 AM

Address space 192.168.0.0/24 (<http://192.168.0.0/24>)

Noor Khan

6:20:13 AM

ok Done

thanks

6:20:16 AM

if i want to add more subnet can i use 192.168.1.0/26
(http://192.168.1.0/26) 6:20:52 AM

Vivek Kumar Mishra 6:27:13 AM

For subnet, cidr value always greater than vnet cidr value

BA

Balachandran 6:28:15 AM

You can add one more subnet as 192.168.0.64/26
(http://192.168.0.64/26) for address space 192.168.0.0/24
(http://192.168.0.0/24)

Noor Khan 6:28:35 AM

hhhmmm

thanks 6:28:40 AM

I have a question... Under EA ..if we already have a subscription used by a different team supported Azure AD, and if I Hv created a subscription created without knowing that.. (if I am not wrong when we create a subscription, we are getting AAD too.. feel free to correct me).. If I wanted to use the existing AAD, created by the other team, will this be possible... If yes how do we do it.. ? Will this can be considered as a single directory structure...?

Lalit Rawat

7:22:18 AM

I think in that case u can use the application gateway

But I like check more and update u

Niraj Kumar

Well said! Fear of Mistake must not deter us from experimentation...
true nitaj bhai. Fear of mistakes some time stop us to learn new things.

Amar Singh

10:32:43 AM

Provisioning failed. The specified cookie value in VHD footer indicates that disk 'SinAzeWin07osDisk' with blob <https://sglcustomimgae.blob.core.windows.net/vhds/sinazewin07-SinAzeWin07osDisk.vhd> (<https://sglcustomimgae.blob.core.windows.net/vhds/sinazewin07-SinAzeWin07osDisk.vhd>) is not a supported VHD. Disk is expected to have cookie value 'conectix'.. InvalidVhd

any one know why i am getting this error

10:33:02 AM

Lalit Rawat

10:34:03 AM

Amar Singh

Provisioning failed. The specified cookie value in VHD footer in r u trying re-image the vm with generalized vhd ?

Amar Singh

10:35:06 AM

no i am trying to create an vm by suing my custom window 7 image

through powershell

10:35:27 AM

i have done same step for window 10 vm

10:35:45 AM

that works without any error

10:36:01 AM

Lalit Rawat

10:36:13 AM

did your generalizd the image properly

Amar Singh

10:36:25 AM

yes

Lalit Rawat

10:36:32 AM

ok.

Amar Singh

10:37:02 AM

do you have step by step guideline to verify the same

Vivek Kumar Mishra

10:37:21 AM

windows 7 not supported by Azure

as per my knowledge

10:37:33 AM

Amar Singh

10:38:50 AM

even i was thinking the same before going thro this link

<https://azure.microsoft.com/en-in/updates/windows-7-and-windows-8-1-client-vm-images-msdn-subscribers/>
(<https://azure.microsoft.com/en-in/updates/windows-7-and-windows-8-1-client-vm-images-msdn-subscribers/>)

10:38:51 AM

Windows 7 and Windows 8.1 client VM images are now available for MS... (<https://azure.microsoft.com/en-in/updates/windows-7-and-windows-8-1-client-vm-images-msdn-subscribers/>)

see MS is saying

10:39:11 AM

Vivek Kumar Mishra

10:39:26 AM

its 64 bit right?

Amar Singh

10:39:58 AM

yes

Lalit Rawat

10:40:04 AM

Amar Singh

<https://azure.microsoft.com/en-in/updates/windows-7-and-w...>
yes it is supported.

Amar Singh

10:41:51 AM

any other suggestion how to fix this issue

Lalit Rawat

10:43:48 AM

you do onething create new VM and install win 7 and run sys prep. Then go to azure create new container try to add new vhd on this. try

i think that error when image is not properly generalized.

10:44:28 AM

Vivek Kumar Mishra

10:47:35 AM

Amar Singh

i thought its different
ohh..ok..

Niraj Kumar

12:24:45 PM

Lalit Rawat

Niraj bhai, but it is showing in calculator, not sure how
I don't see Availability set only Scale Set.

Availability Set and Scale Sets are different. Not same.

12:25:36 PM

Siva joined group via invite link

Niraj Kumar

12:26:59 PM

In Azure, virtual machines (VMs) can be placed in to a logical grouping called an availability set. When you create VMs within an availability set, the Azure platform distributes the placement of those VMs across the underlying Azure infrastructure.

Surya Dilip joined group via invite link

Siddharth joined group via invite link

Maheswaran Veeriah joined group via invite link

Lalit Rawat

12:28:10 PM

Niraj Kumar

In Azure, virtual machines (VMs) can be placed in to a logical group
got it bhai, thanks again.

one question: Which one is good for fault tolerance , Availability set or Scale set ? 12:29:35 PM

means Best practices ? 12:30:28 PM

Shakti Ranjan

12:30:32 PM

Rajiesh George

It cost you double because you are going to put 2 instances instead of one to get more SLA. you can deploy multiple instances in availability set with different fault and update domain. and will cost as per instances and storage.

Amar Singh

12:30:36 PM

Avset

Lalit Rawat

12:30:50 PM

one question: Which one is good for fault tolerance , Availability set or Scale set ?

SM

Sree Harsha MS

12:31:17 PM

Niraj Kumar

Correct about P1 P2. Customer will need to buy premium sub...

Thanks Niraj. yeah, I am aware of EMS with EMS E3 you get P1 and E5 you get P2. but so every azure customer has to separately purchase premium features, its not part of the subscription although they have it on EA

Lalit Rawat

12:31:17 PM

Amar Singh

Avset

Thanks Amar

Shakti Ranjan

12:31:50 PM

Lalit Rawat

one question: Which one is good for fault tolerance , Availability set and Scale set both are different concept.

Lalit Rawat

12:33:50 PM

Shakti Ranjan

Availability set and Scale set both are different concept.

So the cost will be on Per VM running time +storage space taken by the VM correct ?

Niraj Kumar

12:33:51 PM

Sree Harsha MS

Thanks Niraj. yeah, I am aware of EMS with EMS E3 you get ... Unfortunately, yes EA customer has to subscribe for AD premium separately.

Shakti Ranjan

12:34:45 PM

Lalit Rawat

So the cost will be on Per VM running time +storage space t...
Right. No cost of availability set as mentioned by Niraj.

Niraj Kumar

12:35:16 PM

Lalit Rawat

one question: Which one is good for fault tolreance , Availabili
Availability set is different than scaleset. Availability set you don't
need to maintain identical hardware or code

Plus it guarantees against hardware failure and software update
of your server.

12:36:50 PM

Lalit Rawat

12:37:09 PM

Niraj Kumar

Availability set is different than scaleset. Availability set yo
goted, Now one more concept is clear niraj bhai

Niraj Kumar

12:37:53 PM

on my EA account but once you click on create it will give you s
Right.. I am also getting same.

1:01:46 PM

Rajiesh George

1:05:28 PM

My point is we can't use FD with one VM. This is HA feature, h...
Yes.., your single VM also deployed in one fault domain and one
update domain. But here concept is as you have only one VM in
AVL set and suppose that deployed in rack A and that is got failed
or fired in MS datacenter then you don't have HA as you have one
VM in AVL set.

Rajiesh George

1:07:06 PM

Shakti Ranjan

Yes.., your single VM also deployed in one fault domain and one

You are correct

Shakti Ranjan

1:07:18 PM

If you deployed multiple instances in AVL set then all have there different falut and update domain ...if one unavailable then other will up and running.

I have one doubt from long back and still not clear in proper way. Doubt is suppose I want a disk drive of size 10TB for that we can use 10 disks of 1 TB or now we can use two 4TB and one 2TB data disks and stripe all disks to make one drive of size 10 TB. With this 10TB data disk we will get high throughput and IOPS that is advantage for us. But what is the SLA or guarantee that failure of single disk from striped disk. In my case, example I have taken 10 data disks of 1 TB and made it 10TB by Striping of disks. So here if one disc get failed in MS datacenter then disk of 10TB will not respond until that 1TB failed disk get resolved. So how can we look into this.?

Rahul Ambhore

1:13:04 PM

Shakti Ranjan

I have one doubt from long back and still not clear in proper wa
Use managed disk

Managed premium SSD will take care of it

1:13:36 PM

Shakti Ranjan

1:13:41 PM

Rahul Ambhore

Use managed disk

Are you sure you will get 10GB disk in managed disk.?)

sorry 10 TB

1:13:50 PM

Rahul Ambhore

1:14:25 PM

Yes, you can create

I mean

1:14:50 PM

Shakti Ranjan

1:14:59 PM

This solution only possible with striping.

Rahul Ambhore

1:15:19 PM

Shakti Ranjan

This solution only possible with striping.

Yes that is wht

4+4+2

1:15:27 PM

Shakti Ranjan

1:16:21 PM

ok got it what you want to say...but I want concept behind it in unmanaged disk

I never faced this issue in production ..but if customer ask then I will be blank. 1:17:51 PM

Rahul Ambhore

1:18:01 PM

If u even use unmanaged premium disk...u will get SLA

Shakti Ranjan

1:18:59 PM

yes but what SLA as I am using 10 different disks.

Rahul Ambhore

1:18:59 PM

I am using unmanaged premium disk for backup server

Shakti Ranjan

1:19:45 PM

Rahul Ambhore

I am using unmanaged premium disk for backup server

Backup server means what.?

I would suggest you to use premium disks for log and data drive and take backups of DB's in blob directly. 1:20:49 PM

Rahul Ambhore

1:22:11 PM

Shakti Ranjan

Backup server means what.?

We've another backup solution for file and folder level backup for critical workload

Shakti Ranjan

edited 1:22:31 PM

Make one job in SQL to take backup of DB's in blob on daily basis full backup and hourly basis for transactional logs depends on your requirement.

Rahul Ambhore

1:22:44 PM

We've another backup solution for file and folder level backup f That is also fine.

Shakti Ranjan

1:23:36 PM

I have one doubt from long back and still not clear in proper wa Still I am looking for this.

Lalit Rawat

1:31:29 PM

Any concern about service HA??

Niraj Kumar

9:42:55 PM

Any concern about service HA??
Here it is.

Rukhsar Ahmad

9:46:49 PM

We have moved all application configuration to DB and role
staturp reading from DB and set in-proc variables to consume in
application. if any configuration update required we do in DB and
do pub/sub to update in-proc variable to avoid cloud service
restart. as per observation sometime pub/sub work fine some
time not...so if configuration not updated by pub/sub then we
need to restart service.

so i have doubt on Redis pub/sub framework or may be ..we have
missing something in code

Dear Subscribers,

Thank you for showing interest in "AzureTalk-Learning Azure The Ezy Way"! It's an absolutely free 1-hour weekly recurring session to learn Azure! Following is agenda for this week.

- Time & Date: July 15th, Saturday 8:00 AM EST, Saturday 5:30 PM IST
- Place: Online Skype meeting.
<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>
(<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>)
- Speaker: Niraj Kumar
- Agenda: Azure Networking Part-3. ExpressRoute

What is AzureTalk?

- Weekly recurring 1 hour session to cover wide array of topics on Microsoft Azure.
- Session has 3 parts
 - o 1st part I'll walk you through "Azure Concept Of The Week" by utilizing deck.
 - o 2nd part we do a live demo and implement what we discussed earlier.
 - o 3rd part Q & A session.
- These are live sessions and you will get an opportunity to ask questions. Make full use of time!
- Recorded sessions are published onto our AzureTalk Youtube channel.
- You could also join our Azure Talk Telegram Group for even better experience! Ask questions and get answers from the experts.
- You can refer all past Azure Talk here.

Thanks,

AzureTalk Team!

.....

10:19:23 PM

Guys feel free to share the invite for Azure Talk to others who would like to participate in AzureTalk sessions! The Skype link for joining the meeting remains same every week and we just change the agenda.

Please use Free Skype Meeting App and not company provided Desktop Skype client to join the session. When you click on above link it'll give you option to join with Skype Meeting App. Please use it!

Chandra Reddy

5:03:21 PM

I wanted to create a VHD once and push it all subscriptions , how can I do it ?

Niraj Kumar

5:28:57 PM

I have limited exposure to image management but you can store generalized vhd in blob storage and import it as part of custom image.

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/tutorial-custom-images>
(<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/tutorial-custom-images>) 5:29:02 PM

(<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/tutorial-custom-images>)

Docs

Create custom VM images with the Azure PowerShell
(<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/tutorial-custom-images>)

Tutorial - Create a custom VM image using the Azure PowerShell.

CR **Chandra Reddy** 6:39:21 PM
I'm using packer to build vhd , and push it to one subscription

Uday Kumar 6:39:35 PM
anyone here has some experience or familiarity with Kubernetes, the Docker Orchestration platform?

CR **Chandra Reddy** 6:40:12 PM
My requirement is to push it to multiple subscriptions , can I use a single service principal and push vhd to multiple subscriptions ?

Niraj Kumar 6:41:12 PM

Chandra Reddy

My requirement is to push it to multiple subscriptions , can I u
Yes as long as all the subscriptions are sharing the same Azure AD

Or you will have to create a Guest account in other Azure AD 6:41:27 PM

CR **Chandra Reddy** 6:56:33 PM
Yes we are sharing same AD , do you have any reference URL to do this ?

Noor Khan

9:46:59 PM

Hi team, one small confusion, let say I am adding two machines in availability set.

One is AD and another is mail server

9:47:18 PM

So it will decide in to two rack

9:47:52 PM

My question is if I am assigning a assigning a AD machine in avlset will it create a copy of that server or not

9:48:59 PM

Niraj Kumar

9:50:43 PM

RA

Ram

10:01:19 PM

Noor Khan

My question is if I am assigning a assigning a AD machine in a...

Hi Noor ..I don't much knowledge and expert can answer ...but what I know no VM will be created automatically if you add one VM in availability set ...also I believe best practices should be add same /application (tg://bot_command?command=application) type of server in one availability set to get benefit of this

Noor Khan

10:03:21 PM

If I add any VM in avlset it will automatically create a copy of that VM in another rack right

RA

Ram

Vivek Kumar Mishra

10:05:50 PM

Noor Khan

If I add any VM in avlset it will automatically create a copy of
Nope

Minimum requirements for avlset is two vm

10:06:16 PM

Noor Khan

10:06:22 PM

Hhmm Mishra ji good morning

Vivek Kumar Mishra

10:06:35 PM

Good morning

Noor Khan

10:06:39 PM

Mns same app vms should be two

Vivek Kumar Mishra

10:06:48 PM

Yes

RA

Ram

10:07:07 PM

I believe you need to create manually minimum 2 and availability set will just manage it between rack

Vivek Kumar Mishra

10:07:10 PM

You can goto avlset n check the update domain n fault domain

Noor Khan

10:07:22 PM

If I want to add sql server to avlset

Then I should add 2 sql mch

10:07:37 PM

	Right	10:07:39 PM
	Vivek Kumar Mishra Right	10:07:48 PM
	Noor Khan Ok ok	10:08:03 PM
	Vivek Kumar Mishra Two vm with same copy	10:08:09 PM
	Noor Khan That's was my confusion	10:08:16 PM
	Vivek Kumar Mishra So that if one goes down other will surv your request	10:08:37 PM

(<https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-get-started-ilb-arm-portal>)

Learn how to create an Internal load balancer in Resource Manager using the Azure portal

- RO **Rohan** 11:10:12 AM
We have 2 VMs between which a ILB is configured and the probe ports assigned are 80 and 443....we are running a custom service for biztalk application we find that the traffic through load balancer always goes to only one of the VM
- Ran wireshark and portquery to see if anything is blocked also the NSG rules all seem okay 11:10:48 AM
- One discrepancy i noticed that the parameter loadbalanced distribution mode is not setis it necessary to pass this parameter ? 11:11:47 AM
- Himanshu** joined group via invite link
- RO **Rohan** 11:15:09 AM
Also the connection breaks attyms between this particular service and load balancer VIP ...intermittent response is received
-  **Lalit Rawat** 11:15:29 AM
Rohan
One discrepancy i noticed that the parameter loadbalanced d... try configuring it.
- RO **Rohan** 11:15:52 AM
Yes Lalit I will try it
-  **Lalit Rawat** 11:16:09 AM
did your put traffice manger to route the traffice between the servers
- RO **Rohan** 11:16:26 AM
We dont have traffic manager here in environment
-  **Lalit Rawat** 11:16:39 AM
ok
- RO **Rohan** 11:17:59 AM
I am not able to understand if this load balancer uses the 5 tuple hash algorithm or the 2 tuple / 3 tuple
-  **Lalit Rawat** 11:18:43 AM
it should be 3 tuple

RO **Rohan** 11:19:33 AM
Ok how are you understanding this ?

Is there some command to check this in powershell ? 11:19:55 AM

 **Lalit Rawat** 11:21:20 AM
<https://azure.microsoft.com/en-in/blog/azure-load-balancer-new-distribution-mode/> (<https://azure.microsoft.com/en-in/blog/azure-load-balancer-new-distribution-mode/>) check this u
 ll be able get an good information on this article

 (<https://azure.microsoft.com/en-in/blog/azure-load-balancer-new-distribution-mode/>)
 Microsoft
Azure Load Balancer new distribution mode | Blog | Microsoft Azure (<https://azure.microsoft.com/en-in/blog/azure-load-balancer-new-distribution-mode/>)
 We have introduced a new distribution mode called Source IP Affinity and is also known as session affinity or client IP affinity. Azure Load Balancer...

RO **Rohan** 11:21:49 AM
Ok thanks

Also one more thing is it necessary for a VM to have 2 NIC cards for the load balancing configuration....we have 1 NIC in each VM and all traffic flows through them 11:23:16 AM

 **Lalit Rawat** 11:31:02 AM
Rohan
 Also one more thing is it necessary for a VM to have 2 NIC c... then with one nic how did you configure the ILB , best practice is to use 2 nic so it can manage the traffic easily

let me just verify form my end aswell. 11:31:21 AM

RO **Rohan** 11:32:22 AM
Yes actually i did not configure the ILB ...it was done by Microsoft before I got involved to take a look into the issue ...

 **Lalit Rawat** 11:33:33 AM
ok.. just check the configuration how it is routing the traffice or there is any rule configuried on it.

check if both the VM are in the same subnet or in a differant subnet ? 11:35:01 AM

RO **Rohan** 11:41:20 AM
Yes both VMs are in same subnet

Lalit Rawat

k

11:41:31 AM

RO

Rohan

11:42:10 AM

Rule means you are talking about the ACL rules set under the load balanced tab ?

Lalit Rawat

11:43:11 AM

Rohan

Rule means you are talking about the ACL rules set under th...
yes , ILB i sconfiguried in ARM or ASM portal ?

RO

Rohan

11:43:25 AM

ASM portal

Lalit Rawat

11:44:43 AM

Please check both the VMs has same cloud service or diffrent , if they are having differant service then it won't work ?

U can use

11:52:27 AM

<https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-get-started-ilb-classic-cli>

11:52:27 AM

(<https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-get-started-ilb-classic-cli>)

(<https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-get-started-ilb-classic-cli>)

balancer/load-balancer-get-started-ilb-classic-cli)

Docs

Create an Internal load balancer - Azure CLI classic
(<https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-get-started-ilb-classic-cli>)

Learn how to create an internal load balancer using the Azure CLI in the classic deployment model

RO

Rohan

12:20:33 PM

Yes both VMs have same cloud service Lalit

I think 2 nic cards not present might be an issue or the load balanced distribution parameter not set

12:21:51 PM

Lalit Rawat

12:22:56 PM

then it should work , yes that could be the reasion, they failover is happing if your shutdown one VM ?

u can bring that MS guys who configure the ILB for your he can gave the more details,

12:23:26 PM

Rohan

RO No even if i shut down the VM the traffic goes to one VM only and that too intermittently 12:23:35 PM

 **Lalit Rawat** 12:25:02 PM
ohh.. ok. that i am sure that ILB is not configure properly .You can bring the MS guys who configure that ILB and ask to provide the all the details , Make it correct.

RO **Rohan** 12:25:28 PM
Yes let me see if they can find the fault in the ILB config

 **Lalit Rawat** 12:25:44 PM
because we don't what how he setup the ILB and if though there si starte forward process.

RO **Rohan** 12:25:44 PM
Thanks Lalit for your suggestion

 **Lalit Rawat** 12:25:53 PM
ur welcome

RO **Rohan** 12:26:11 PM
I will also try and remove the endpoints once and add then back to see if that works

 **Lalit Rawat** 12:26:30 PM
u can ask th eMS guys to bring your technical advision (TA) if he is not able to fix

sure 12:26:31 PM

RO **Rohan** 12:26:41 PM
Yes

 **Shakti Ranjan** 12:47:26 PM
Lalit I think Rohan should check what routing method given in ILB.

As per above msg it behaving failover. 12:48:11 PM

 **Lalit Rawat** 12:49:04 PM
Shakti Ranjan
Lalit I think Rohan should check what routing method given i...
Yes, i think this what i have missed thank you shakthi bhai :)

12:49:11 PM

 **Shakti Ranjan** 12:49:18 PM

Rohan

RO Ok routing method for the ILB 12:49:32 PM

Lalit Rawat

12:49:52 PM

yes

RO **Rohan** 12:50:29 PM

That can be done using powershell ?

Lalit Rawat

12:51:18 PM

Lalit Rawat

<https://docs.microsoft.com/en-us/azure/load-balancer/load-b...>

yes , use thei article.

Its not Possible due to security consideration :(

What do u want to achieve ?

U can do all the task if u have a. Co administrator or owner of subscription

6:25:47 PM

Suresh Mallela

6:26:04 PM

Lalit Rawat

What do u want to achieve ?

i thought of adding my Org ID as service admin to other subscription

Lalit Rawat

6:26:34 PM

U can do all the task if u have a. Co administrator or owner of yes correct. but tried to add as Service admin.

Lalit Rawat

6:27:57 PM

U can do it from classic I ll guide just give me moment

Karthik G

8:10:31 PM

Dear All,

Greetings!!!

I'm looking for a job change in Azure (IaaS), I have completed Microsoft Certification in 70 - 533 Implementing Microsoft Azure Infrastructure Solutions.

My overall experience is 3 years 1 month in that 2 years experience in Azure (IaaS). So kindly let me know if there any openings available for my profile. Thanks.

Niraj Kumar

9:37:50 PM

Lalit Rawat

correct shakti bhai.

Could we not login to azure account center and change the service admin?

<https://account.azure.com/Home/Index>
(<https://account.azure.com/Home/Index>)

9:39:26 PM

But not sure if it would work for org id. 🤔

9:42:01 PM

Niraj Kumar

10:19:36 PM

Lalit Rawat

U can do it from classic I ll guide just give me moment
From classic you can set co admin but not service admin. For setting service admin you need to login to Azure account central!!

Niraj Kumar

9:58:42 AM

But not sure if it would work for org id. 🤔
If you are logged in with a Microsoft Account, you can only add other Microsoft Accounts as Service Administrator or Co-Administrator. This is a security consideration to prevent non-organizational accounts from discovering if certain accounts (e.g. janedoe@contoso.com (mailto:janedoe@contoso.com)) are valid accounts.

HR **Harish Reddy** 9:59:37 AM

What is future of Private cloud?

Earlier AWS was considering only Private cloud as it's competitors. Now after rise of Private cloud offering such as Microsoft with Azure stack, IBM with Bluemix stack, and Oracle with it's own Private cloud.

Looks like the next fight will be for Private cloud and AWS is having persistence in it. Private cloud is always having future as investment is already done for 1000 billion \$ which can not be discarded in a day.

Guys due to some logistic reasons, I will be unable to take AzureTalk on Networking and instead will conduct AMAQ, Ask me any question Q&A session.

Niraj Kumar: 12:06:12 AM
Dear Subscribers,

Thank you for showing interest in "AzureTalk-Learning Azure The Ezy Way"! It's an absolutely free 1-hour weekly recurring session to learn Azure! Following is agenda for this week.

- Time & Date: July 22nd, Saturday 8:00 AM EST, Saturday 5:30 PM IST
- Place: Online Skype meeting.
<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>
(<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>)
- Speaker: Niraj Kumar
- Agenda: AMAQ, Ask me any question, Q&A.

What is AzureTalk?

- Weekly recurring 1 hour session to cover wide array of topics on Microsoft Azure.
- Session has 3 parts
 - o 1st part I'll walk you through "Azure Concept Of The Week" by utilizing deck.
 - o 2nd part we do a live demo and implement what we discussed earlier.
 - o 3rd part Q & A session.
- These are live sessions and you will get an opportunity to ask questions. Make full use of time!
- Recorded sessions are published onto our AzureTalk Youtube channel.

- You could also join our Azure Talk Telegram Group for even better experience! Ask questions and get answers from the experts.
- You can refer all past Azure Talk here.

Thanks,
AzureTalk Team!

Welcome to the group Nish! Guys! Nishith is my colleague at EY

Welcome nishith

NS

Nishith Shah

1:45:23 PM

Thanks Group !

I hope the team won't mind some of the Azure limitations talk

I think we should also talk about how Azure falls short of Enterprise capabilities in some of its core offerings

For an Enterprise which has many business lines and applications the Azure subscription mode poses many challenges

The more subscriptions you have it's operationally difficult to manage (connectivity) plus cost increases (Example Express route) with number of subscriptions

If you go with less subscriptions path (sharing subscriptions among applications) you will start hitting Azure limits and architecture becomes more complex and unmanageable

The PaaS solutions are rolled out with lot of promises but integrating it with IaaS solutions poses many security challenges

The Azure NSGs are very primitive

Please do not compare these challenges with AWS because this is Azure talk 😊

1:47:08 PM

Niraj Kumar

2:49:53 PM

I would say public cloud in general including azure has limitations when it comes to very large and complex organizations. Nothing is perfect from the get go but willingness to listen to customers feedback and improving product is important and Azure and Microsoft both are doing it. Our expectations are high and Azure is rolling out features fast to meet or exceed the customers

requirements. No product in IT industry is complete or flawless otherwise you will never have next version of product.

Rahul Ambhore

2:51:19 PM

Niraj Kumar

Welcome to the group Nish! Guys! Nishith is my colleague at EY
Welcome

Niraj Kumar

2:54:10 PM

Nothing is perfected in one day or in one big swoop. It's cycle of innovation-implementation-feedback-release and finally start over again.

Noor Khan

2:57:07 PM

Niraj Kumar

I would say public cloud in general including azure has limitations
well said sir

Niraj Kumar

2:57:32 PM

I remember Windows NT days and Windows 2016 now. Have worked on all flavors of it and all of its predecessors had some problem or limitations. Microsoft constantly gathered feedback, analyzed support incidents to include additional features in new releases to address those shortcomings.

One good thing about Microsoft in general which positions favorably in Large Enterprises is their vast experience and organized product support and it comes from not only cloud but their all software product support experience including Exchange, Skype, Active Directory, Windows Server, System Center products, SQL, Xbox, SharePoint and more

3:02:43 PM

Their tiered support is one of the remaining best in the industry

3:05:30 PM

NS

Nishith Shah

3:43:55 PM

I am surprised that you are not seeing Microsoft's habit of releasing buggy products and making money off fixing it

They haven't changed that habit with Azure 😊

NS

Nishith Shah

4:23:59 PM

Example

Azure core storage offering (journal purpose storage)

Azure call it unmanaged storage

Azure offers 99.999% reliability on it

Recently we found that the underlying storage arrays (stamps) are not redundant unless you create separate storage accounts for it and assign VMs in availability Group to different storage accounts

This becomes an issue if you are sharing multiple applications in a single subscription and very soon you will hit azure storage account limits

Microsoft's solution for it is its newly announced "managed storage" with no storage account or storage limits
Microsoft will manage it for you

But catch is it's more expensive than unmanaged storage

So in short they released a product which doesn't meet the availability requirements and now they want us to use so called better product which costs more

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

4:58:17 PM

I have tested in preview

Hi Nino or Lalit! Have you tested Storage Space striped disk and ASR backup?

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

4:59:49 PM

About that i dont tested

Lalit Rawat

Yes both works good for my customers.

4:59:59 PM

Niraj Kumar

5:00:52 PM

Is there data size limit for storage space with ASR?

Like can you backup more than 4 tb of drive size?

5:01:20 PM

Lalit Rawat

5:02:19 PM

Yes we can I have did it and we have moved approx 10tb data in using azure

But limitations with only file share storage account which is 5 tb

5:02:49 PM

Niraj Kumar

5:04:59 PM

Somebody was telling me that ASR file recovery doesn't work with new 4tb disk size vhd.

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:05:36 PM

Maybe that because the storage that you create with less of 4tb

Lalit Rawat

5:05:38 PM

I have recently migrated with 4,tb

Or probably it might be increase during the migration or I m not sure.

5:06:23 PM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:07:48 PM

Don't work you can add 4tb but you only use 200GB, the backup only made the 200GB

Lalit Rawat

5:08:37 PM

He has to apply new updates of asr otherwise it will not work.@niraj Bhai u remamber that u have shared the articles with 4tb support on that day I have tried it works perfectly

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:09:44 PM

You can add 4tb on storage bit you only copy the space used

Niraj Kumar

5:10:21 PM

Lalit Rawat

He has to apply new updates of asr otherwise it will not work....

Oh you already tested

Lalit Rawat

5:10:42 PM

Niraj Kumar

Oh you already tested

Yes bhai

Niraj Kumar

5:11:13 PM

Great

Anybody here done an analysis between VEEAM an IaaS based backup solution and ASR a PaaS based backup solution?

<http://wp.me/p90mOG-1I>

There were many questions including designing, architecting,
securing Azure cloud. Some of the questions included followings:

How do we plan and architect an enterprise infrastructure move
from On-Prem to Azure cloud? What planning and due diligence
are needed for a successful cloud migration?

How should you plan & design an Azure subscription Model?
Centralized or Decentralized?

How to design a highly available Web application? What Azure
components can be utilized to design a typical Web Application?
What are available tools for application assessment, migration?

How to secure and protect azure infrastructure? What measures
can be taken to secure public cloud?

How and what to do to prevent DDOS against infrastructure
hosted in Azure?

How and when to select right cloud for customer Azure Vs Aws?
Future of cloud revolution!

Phase 1- Migration from On-Prem Data center to IaaS running in cloud.

Phase 2- Migration from IaaS to PaaS.

Phase 3- Migration from PaaS and building our own custom application to SaaS.

The future belongs to Hybrid cloud. Azure Stack will give strategic advantage to Microsoft in Hybrid cloud space.

What container orchestration tool to use Docker or Kubernetes.

5:31:43 PM

What's up peeps?!? Not reading to much Security talk, what are some of you using for IAM, Vulnerability Management, AV? Native Azure solutions (ASC & OMS) or third party integrations?

Lalit Rawat

5:45:44 PM

i did use IAM and OMS integration with SCOM

Maurice Witten

5:45:55 PM

What's up peeps?!? Not reading to much Security talk, what a... it work for me

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:54:02 PM

you send information from scom to OMS or send information from OMS to SCOM?

Lalit Rawat

5:54:37 PM

It will work SCOM to OMS

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:55:13 PM

i work to send OMS to SCOM with app logic

because i have compliance project

5:55:31 PM

Lalit Rawat

5:55:33 PM

it will work both the ways

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:56:02 PM

only work in 1 way, is to send information from scom to OMS

the architect of MSFT tell me that information

5:56:16 PM

Lalit Rawat

5:56:20 PM

yup..

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:56:50 PM

which version of SCOM you are using? 2012 or 2016?

Lalit Rawat

5:57:12 PM

it collect the all the logs form From SCOM and based on those logs it will suggest the security complaine alert

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 5:58:32 PM

i'm trying to connect the SCOM to OMS, but the url show me one thing and SCOM show another situation

Lalit Rawat

5:59:38 PM

ok, did you ocnfigure the azure OMS connector ?

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:00:13 PM

you need to install the manager pack of OMS

on SCOM

6:00:17 PM

Lalit Rawat

6:00:33 PM

yes , even OMS connector as weill

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:02:03 PM

at this moment i have another project to connect the SCOM to the VM on Azure

Lalit Rawat

6:02:43 PM

ok that will work only with OMS MP and just u need add the subscription

it will take some time to sync.

6:02:52 PM

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:03:13 PM

you need to create on app to register and create account to the SCOM

Lalit Rawat

6:03:38 PM

k

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:04:10 PM

i'm looking the url that i found to connect scom to VM on azure

i use this MP -

6:04:40 PM

Lalit Rawat

6:05:10 PM

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

i use this MP - <https://blogs.technet.microsoft.com/allthat/2017>

let me take look

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:05:32 PM

i follow the document but is the document is not correct

is different on real world

6:05:45 PM

Lalit Rawat

6:05:48 PM

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

i follow the document but is the document is not correct

documents sometime will not help

yup..

6:05:53 PM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:06:17 PM

did you know any url to configure step by step the Scm to Azure?

Lalit Rawat

6:06:37 PM

let me check it

i did it form scom2012R2

6:06:50 PM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:07:16 PM

you can use the MP on SCOM 2012 R2 or SCOM 2016

Lalit Rawat

6:07:35 PM

k

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

6:08:04 PM

they are compatible

Lalit Rawat

6:08:22 PM

ok. thanks.

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:09:03 PM
the url that i send to you, tell you that

 **Lalit Rawat** 6:09:23 PM
k

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:10:07 PM
did you create a certificate on scom to connect to azure?

 **Lalit Rawat** 6:10:19 PM
yes

we have uplod both the ends 6:10:33 PM

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:10:51 PM
you put the certificate on the vault on azure and import to the machines

 **Lalit Rawat** 6:11:51 PM
not machine in OMS not machine

i remember 6:11:53 PM

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:13:20 PM
why you use scom to send information to OMS if you can install OMS on on-premises?

 **Lalit Rawat** 6:13:54 PM
that feature is not available at that time.

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 6:14:26 PM
you only need to download the agent OMS and install on the machine

 **Lalit Rawat** 6:15:14 PM
yup,

but that is not my requirement it works like SCOM 6:15:37 PM

<http://www.systemcentercentral.com/windows-azure-pack-scom-management-pack-v2/> 6:15:41 PM
(<http://www.systemcentercentral.com/windows-azure-pack-scom-management-pack-v2/>)

 (<http://www.systemcentercentral.com/windows-azure-pack-scom-management-pack-v2/>)
System Center Central

Windows Azure Pack SCOM Management Pack V2 - System Center Central

(<http://www.systemcentercentral.com/windows-azure-pack-scom-management-pack-v2/>)

Before going into details, this version is NOT upgradable from V1. Sorry for this, simply redesign of the class structure is something I needed to do...

try this may help.

Is there any way change subnet cidr in ARM ??

As far as I know, you can't change it after it's created. You can always add additional subnets.

Vivek Kumar Mishra

12:40:54 PM

Like in ASM we can change it using network config file is there any way in ARM like change in Template?

Niraj Kumar

12:46:02 PM

You couldn't change an existing subnet but can use the network config file to create another subnet. Are you looking to create another replica subnet with different IP

Vivek Kumar Mishra

Is there any way change subnet cidr in ARM ??

I think you can change this by modifying JSON Script and deploy thro VisualStudio.

3:26:56 PM

Thanks

FE

Felipe

4:32:38 PM

Hi all

Lalit Rawat

4:32:52 PM

Felipe

Hi all

yes

FE	Felipe Has anyone of you worked with Azure File Storage?	4:32:52 PM
	Need to provide a central repository to a client to just store files and give them access	4:33:26 PM
	Created a share with a directory and a file for a PoC	4:33:43 PM
	Now I am the owner of the account so only me got the keys	4:34:04 PM
	Lalit Rawat Felipe Now I am the owner of the account so only me got the keys do u need access for that	4:35:35 PM
FE	Felipe Want to let my customer to manage the level of access of users	4:36:23 PM
	So created 2 policies with read & list and read,list & write permissions	4:36:23 PM
	Lalit Rawat ok,	4:37:15 PM
FE	Felipe After that created the SAS keys containing the URL to the files and the Query	4:37:17 PM
	Now,I now I can map the share	4:37:28 PM
	Lalit Rawat yes u can	4:37:37 PM
FE	Felipe However,how are users meant to access the files?	4:37:41 PM
	Do I need to put the URL plus the SAS containing the config all together?	4:38:03 PM
	Am a bit confused on this	4:38:15 PM
	Lalit Rawat they will be able to access the file through API	4:38:17 PM
FE	Felipe Yep	4:38:26 PM
	Can you please explain further?	4:38:33 PM
	How's a normal user meant to connect?	4:38:46 PM
	Lalit Rawat	4:39:10 PM

not mapping the drives.and if you map the drive then all the member has all the access basically microsoft is working on the to enable the access policy on filesahre

FE **Felipe** 4:39:21 PM
Do I need to give them all the SAS?

Ok,so not through mapping the share 4:39:54 PM

 **Lalit Rawat** 4:40:03 PM
yup..

FE **Felipe** 4:40:29 PM
What they need is to put the URL and the query on the browser to access the share through the Internet?

 **Lalit Rawat** 4:40:42 PM
better u can create the VM and create the filehsare , took backup of the on-premises domain and it restore it to azure vm

FE **Felipe** 4:40:49 PM
Sorry if I am sounding clueless but I am just on this

 **Lalit Rawat** 4:40:56 PM
<https://docs.microsoft.com/en-us/rest/api/storageservices/file-service-rest-api> (<https://docs.microsoft.com/en-us/rest/api/storageservices/file-service-rest-api>)

File Service REST API (<https://docs.microsoft.com/en-us/rest/api/storageservices/file-service-rest-api>)

u can use this link 4:41:10 PM

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 4:41:30 PM
you can create a VM with fileshare

Felipe

FE So config wise I've done the above,just need to define the way for users to access the share 4:41:50 PM

Yep,I know 4:41:55 PM

I am trying just to use File Storage,not a file server 4:42:11 PM

 **Lalit Rawat** 4:42:33 PM

Felipe
Sorry if I am sounding clueless but I am just on this
i am trying to say that Azure fileshare solution will not work how on-premises fileshare server works

Felipe 4:42:45 PM
I am trying just to use File Storage,not a file server
ohh ok..

FE **Felipe** 4:42:52 PM
I know that

Not NTFS permissions and SAS instead 4:43:15 PM

I know you can map it but there's no control over permissions 4:43:30 PM

 **Lalit Rawat** 4:43:42 PM
yup,

<https://docs.microsoft.com/en-us/azure/storage/storage-dotnet-shared-access-signature-part-1> (https://docs.microsoft.com/en-us/azure/storage/storage-dotnet-shared-access-signature-part-1) 4:43:47 PM

 (https://docs.microsoft.com/en-us/azure/storage/storage-dotnet-shared-access-signature-part-1)
Docs
Using shared access signatures (SAS) in Azure Storage
(https://docs.microsoft.com/en-us/azure/storage/storage-dotnet-shared-access-signature-part-1)
Learn to use shared access signatures (SAS) to delegate access to Azure Storage resources, including blobs, queues, tables, and files.

FE **Felipe** 4:43:48 PM
So trying to figure out how users will use the SAS to access the share

Read that article,it doesn't explain what I am asking 4:44:08 PM

The API one sounds interesting 4:44:20 PM

Gonna quickly go through it

4:44:26 PM

Lalit Rawat

4:44:38 PM

ok..

Felipe

4:45:44 PM

So trying to figure out how users will use the SAS to access the
i ma expert on this but trying to help you felipe

FE

Felipe

4:49:39 PM

Well,got a few years and projects under my belt,however as we
know this is such a broad platform....

5min and am back

4:49:48 PM

Lalit Rawat

4:50:00 PM

thats true

FE

Felipe

4:54:43 PM

I knew that users access the share through SMB and REST API

SMB: does this imply that they need to map the share locally for
instance?

4:54:59 PM

If so, does the policy get applied to enforce permissions?

4:55:33 PM

Lalit reply when you can, thanks

5:01:20 PM

Niraj Kumar

5:02:27 PM

Felipe

SMB: does this imply that they need to map the share locally f...

Azure File Storage supports SMB 3.0 and you will use it for
accessing the files by a mapped drive.

Azure file storage doesn't support NTFS permissions or it's not
integrated with Azure AD

5:02:51 PM

FE

Felipe

5:03:10 PM

Correct

Lalit Rawat

5:03:52 PM

Felipe

If so, does the policy get applied to enforce permissions?

no they can access using the Storage explorer ,Visual studio
using the shared access key

FE

Felipe

5:04:00 PM

So even if users map the drive (without any kind of
authentication), do the permissions defined in the policy apply?

Niraj Kumar

Felipe

5:04:31 PM

So even if users map the drive (without any kind of authentication) Permission is not controlled by User identity but by SAS signature

FE

Felipe

5:04:54 PM

That makes sense, a conventional user will have no idea about what Visual Studio or Storage Explorer are

I know that

5:05:17 PM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:05:43 PM

You can create a AD and share to that users. You need to know what you want

FE

Felipe

5:05:46 PM

So if I give users the SAS generated from the policy with the permissions defined, how the users can use the SAS to access the share?

Lalit Rawat

5:05:50 PM

not sure about development part

Niraj Kumar

5:06:04 PM

You will use following command to map a drive:
net use [drive letter] \\filestore.file.core.windows.net
(http://filestore.file.core.windows.net)\cloud-drive
/u (tg://bot_command?command=u): [storage account access key]

Lalit Rawat

5:06:17 PM

for waht purpose u try to give the access

Niraj Kumar

5:06:19 PM

Felipe

So if I give users the SAS generated from the policy with the permissions defined, how the users can use the SAS to access the share?
I replied

FE

Felipe

5:06:27 PM

Cool!!!!!!

Niraj Kumar

5:06:36 PM

Use net use command to map the drive

FE

Felipe

5:06:40 PM

Niraj Kumar spotted on!

@nirajkum Thanks man

5:06:49 PM

Niraj Kumar

5:07:00 PM

You welcome!

FE **Felipe** 5:07:32 PM
To recap: I create a couple of policies with different level of access for users

Give them the right SAS key when trying to map the share locally 5:07:55 PM

 **Niraj Kumar** 5:07:56 PM
You can also use Windows explorer to map the drive.

FE **Felipe** 5:08:10 PM
And the permissions defiend in the SAS will be applied, correct?

 **Niraj Kumar** 5:08:24 PM
Yes.

FE **Felipe** 5:08:34 PM
Cool beans

Yeah, users may not know how to do it form the command prompt 5:09:11 PM

 **Niraj Kumar** 5:09:18 PM
When you are trying to map the drive, you will put in File storage account as User name and SAS as password

FE **Felipe** 5:09:27 PM
I know it was a silly questions but when you are between different projects.....

file storage account as user name????????????????? 5:09:58 PM

 **Lalit Rawat** 5:10:13 PM
Niraj Kumar
When you are trying to map the drive, you will put in File stora good to know, let me try this ..

 **Niraj Kumar** edited 5:10:47 PM
For example my file storage account name is **kloudezy3**

I'll use that as username 5:10:52 PM

and SAS as password 5:10:56 PM

This is my File Storage <https://kloudezy3.blob.core.windows.net/> (https://kloudezy3.blob.core.windows.net/) 5:11:50 PM

So **kloudezy3** will be username 5:12:10 PM

and Password will be the SAS 5:12:18 PM

FE **Felipe** 5:12:39 PM
yep, that's the name of the storage account

and then the name of the share

5:12:57 PM

Niraj Kumar

5:13:25 PM

yeah

FE

Felipe

5:26:24 PM

@nirajkum As I see, Storage Explorer does not provide the same permissions as the ones you find in the portal

RA

Renjit Arvind

5:44:40 PM

At present will you replace Nagios or any other VM/ web site monitoring tool with OMS for a enterprises customer?

Considering managed disks are not supported for ASR, can we plan for ASR with a unmanaged disk..If "yes" what are the items which we need to consider to achieve a full blown solution..??

5:47:17 PM

Lalit Rawat

5:57:59 PM

Renjit Arvind

Considering managed disks are not supported for ASR, can w...
Yes u can plan with unmanaged disk and you need storage account based on VM size or usage remaning will be the same

RA

Renjit Arvind

5:59:58 PM

So each VM with a storage account??

Lalit Rawat

6:00:58 PM

one storage account for all or u can devide by prod/test/uat/dev

RA

Renjit Arvind

6:15:33 PM

Ok... Do we need to use a premium storage..??

Lalit Rawat

6:28:30 PM

Up to you but cost will be more depending on the usage

FE **Felipe** 3:26:20 AM

Morning all, @nirajkum Read a bit about SAS with SMB shares and bu the looks these are not supported, only the account keys

Correct em if I am wrong

3:26:26 AM

Does anyone know?

3:30:10 AM

Ajit invited Tushar Mishra

FE

Felipe

3:34:29 AM

So the key thing here is to map a file share locally with SAS and not the account key (for obvious reasons)

If it cannot be done with SMB, how it is done with REST?

3:34:42 AM

Lalit Rawat

5:03:40 AM

Felipe

If it cannot be done with SMB, how it is done with REST?

I have logged the case with Ms on this couple of days back let me check how we will access

FE

Felipe

5:05:20 AM

Ok cool

The only thing I've seen with REST is that you type the URL to your file + the SAS and you directly download the file

5:05:45 AM

But not sure how the permissions got applied....

5:05:53 AM

Plus, once you make the desired changes to the file in question, do you need to download it?

5:06:22 AM

I see that Azure File Storage in terms of security is very immature yet

5:06:49 AM

Lalit Rawat

5:07:14 AM

Felipe

I see that Azure File Storage in terms of security is very immat
Yes

FE

Felipe

5:07:50 AM

So the SAS only get applied on REST API right?

Is there any other service I'd have to deploy for users to uses SAS to get authenticated?

5:08:14 AM

Lalit Rawat

5:08:26 AM

As per my understanding SaaS Key will work only for development guys who just need to access the code form storage useing the Visio .net etc.

Noor Khan

any script with any one for bulk users creations

5:10:14 AM

Lalit Rawat

5:13:18 AM

Here is one response 1:

tried a repro and got the same result. When trying to access the File service SAS URL or Blob service SAS URL, I get the same error message as you: "Server failed to authenticate the request. Make sure the value of Authorization header is formed correctly including the signature."

5:13:22 AM

I generated the SAS Token as you did through the portal. Then I also tried to generate them through Storage Explorer, but had the same result. Please download storage explorer here:<http://storageexplorer.com/> (<http://storageexplorer.com/>)

Then I actually created a file share and within it I uploaded a small txt file (screenshot above). Right-clicking this file and selecting "Get Shared Access Signature" – I generated a SAS token only for the file. Calling this in a API Clients worked and the file is accessible.

Discussing this inside my team, my colleagues were also not sure if the SAS Token will work for the whole file share.

Therefore my question, if you would only like to access files (as this is possible as described below) or the whole file share. Please let me know, in order to research further to see if this is possible and how.

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

5:15:01 AM

<https://docs.microsoft.com/en-us/azure/security-center/security-center-just-in-time> (<https://docs.microsoft.com/en-us/azure/security-center/security-center-just-in-time>)

([https://docs.microsoft.com/en-us/azure/security-center-just-in-time](https://docs.microsoft.com/en-us/azure/security-center/security-center-just-in-time))

Docs

Just in time virtual machine access in Azure Security Center (<https://docs.microsoft.com/en-us/azure/security-center/security-center-just-in-time>)

This document walks you through how just in time VM access in Azure Security Center helps you control access to your Azure virtual machines.

Lalit Rawat

5:16:09 AM

Felipe u may find something here here:

Regarding the API error I would ask you to check the below link in order to see if these are possible resolutions to bypass the error message: 5:16:16 AM

<https://blogs.msdn.microsoft.com/kwill/2013/08/27/http-403-server-failed-to-authenticate-the-request-when-using-shared-access-signatures/>
(<https://blogs.msdn.microsoft.com/kwill/2013/08/27/http-403-server-failed-to-authenticate-the-request-when-using-shared-access-signatures/>)

Go through the blog above and see if removing 'StartTime' from the code resolves the problem. Else capture a Fiddler trace for further analysis and send me this. Download it from here:<https://www.telerik.com/download/fiddler> (<https://www.telerik.com/download/fiddler>) . But please test out the scenarios below as well.

<http://stackoverflow.com/questions/25038429/azure-shared-access-signature-signature-did-not-match>
(<http://stackoverflow.com/questions/25038429/azure-shared-access-signature-signature-did-not-match>)

Short Answer:

Add comp=list&restype=container to your SAS URL and you should not get this error.

Long Answer:

Essentially from your SAS URL, Azure Storage Service is not able to identify if the resource you're trying to access is a blob or a container and assumes it's a blob. Since it assumes the resource type is blob, it makes use of \$root blob container for SAS calculation (which you can see from your error message). Since SAS was calculated for markblob container, you

get this Signature Does Not Match error. By specifying restype=container you're telling storage service to treat the resource as container. comp=list is required as per REST API specification.

<http://stackoverflow.com/questions/18500351/sas-for-blob-write-access-keeps-causing-403-authentication-error-with-azure-stor>
(<http://stackoverflow.com/questions/18500351/sas-for-blob-write-access-keeps-causing-403-authentication-error-with-azure-stor>)

Can you please check the sig part of the SAS token? Especially look for + sign there. I have seen a similar issue here not too long ago where occasionally SAS URL was failing with 403 error. It turned out the SAS token has a plus sign in it which is URL encoded value for space. Since the SAS token is sent as URL, + sign in the token was interpreted as space and resulted in 403 error.

<https://blogs.msdn.microsoft.com/avkashchauhan/2011/06/17/when-using-shared-access-signature-sas-with-windows-azure-it-is-best-to-use-uri-absoluteuri-instead-of-uri-tostring/>
(<https://blogs.msdn.microsoft.com/avkashchauhan/2011/06/17/when-using-shared-access-signature-sas-with-windows-azure-it-is-best-to-use-uri-absoluteuri-instead-of-uri-tostring/>)

FILE COPY, maintain PERMISSIONS

As you know AZfiles doesn't support ACLs however a potential workaround using Azure Files is to perform a windows backup (see WORKAROUND section below)

The other alternative is to copy the contents of the on-premises data into either a single or multiple .VHD files (preserving the file permissions) and upload to Azure.

Test AZCopy

"C:\Program Files (x86)\Microsoft SDKs\Azure\AzCopy\azcopy"

```
/Source (tg://bot_command?command=Source):c:\azurefiles\  
/Dest (tg://bot_command?  
command=Dest):https://azurefs01.file.core.windows.net/downloa  
ds/  
(https://azurefs01.file.core.windows.net/downloads/) /DestKey  
(tg://bot_command?command=DestKey):abcdefgh1234567890  
/S (tg://bot_command?command=S)
```

Thanks nuno

FE

Felipe

5:19:40 AM

Hi Lalit I manage to fix the REST API issue and was able to download the file in question

Once downloaded, not sure that the permission defined within the SAS got applied 5:20:02 AM

Even if the did, what the user expected to do after they are able to edit the file, upload it again to the file share? 5:20:29 AM

In terms of SAS at the storage level, not sure it is supported 5:20:48 AM

If it's at the file level, that's a nightmare 5:21:02 AM

Lalit Rawat

5:21:06 AM

Felipe

Even if the did, what the user expected to do after they are abl
 They can edit the file if they have permission

Can u just give the edit permission to your self and try
downloading then edit we will know how this process works

5:21:46 AM

The will be to upload to the filesahre if they have access to it.

5:22:49 AM

Chandrasekhar G joined group via invite link

FE **Felipe** 6:15:58 AM

Talk to you later but File Storage from a security perspective is
still very immature

We're not going to use it, instead an IaaS file server

6:16:12 AM

Lalit Rawat 6:16:59 AM

Felipe

Talk to you later but File Storage from a security perspective i
That's true even Ms also know

Boikanyo B invited Pieter Neethling

Boikanyo B 6:34:44 AM

Welcome, Pieter!

RA **Renjit Arvind** 7:47:05 AM

Thank you Buddies... for the answers... OMS + App insight .. OMs
itself is combination of more than one tool... did anyone use it
here to a very detail level ??

Bhanu Sharma joined group via invite link

Lalit Rawat 7:52:20 AM

Renjit Arvind

Thank you Buddies... for the answers... OMS + App insight
Yes it is combination of the more the 10 tools which help you to
protect monitor backup etc through oms while adding the
modules

RA **Renjit Arvind** 7:58:51 AM

Is it matured enough to replace the other common tools..??

Lalit Rawat 7:59:12 AM

Renjit Arvind

Is it matured enough to replace the other common tools..??
What other tools

RA **Renjit Arvind** 7:59:36 AM

Commonly used monitoring tools

Lalit Rawat 8:00:11 AM

Renjit Arvind

	Commonly used monitoring tools	
	It good tool for monitoring	
	Even u can integrate with scom	8:00:28 AM
RA	Renjit Arvind Plus if I am using ASR (Azure to Azure model)? Do we need to install back-up agent ..I am getting confused with DPM agent, Back-up agent etc...For a enterprises which one should go with ASR?	8:02:15 AM
	I don't use SCOM... my customer heavily on Nagios	8:02:45 AM
	Lalit Rawat Renjit Arvind I don't use SCOM... my customer heavily on Nagios Ok	8:03:04 AM
	Renjit Arvind Plus if I am using ASR (Azure to Azure model)? Do we need t... I think u need to install backup agent , which will help ,I need to work on this, DPM is data protection manager which will help you to take the all kind of data backup	8:05:25 AM
	U can try and test azure to azure s2s in your lab environment	8:05:48 AM
RA	Renjit Arvind If OMS .log analytics, app insight etc... we need to define everything where as other tools has predefined items...	8:06:03 AM
	Lalit Rawat Yup	8:06:29 AM
	They are the services which u are going to integrate with oms	8:07:01 AM
RA	Renjit Arvind Right... but nothing out of box which we can use it without much configuration..	8:08:15 AM
	Lalit Rawat Yup,	8:08:46 AM
	Depends on the services and monitoring level your customer wants	8:09:10 AM
RA	Renjit Arvind Ok..	8:10:28 AM
	So I assume no-one in this group has implement... I just wanted to get a used case..	8:11:22 AM
	Lalit Rawat	

Renjit Arvind

8:12:01 AM

So I assume no-one in this group has implement... I just want...
I did and @NAMM81 has done it

@NAMM81 can help us on this

8:12:25 AM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

8:14:12 AM

You can use the scom to monitor and send the reports to oms

But you need to install the management pack on scom

8:17:47 AM

Niraj Kumar

8:18:24 AM

Lalit Rawat

U can try and test azure to azure s2s in your lab environment
Have tested it and it works great. No agent is needed.

Renjit Arvind

8:19:47 AM

So I assume no-one in this group has implement... I just want...
We implemented OMS to complement SCOM. No Nagios

Renjit Arvind

8:20:42 AM

Plus if I am using ASR (Azure to Azure model)? Do we need t...
No agent is required

RA

Renjit Arvind

8:23:00 AM

Regarding ASR... if we failover to a DR site.... How to we fail back to the Primary? Will it do automatically as soon as the primary comes up

That's really great... if that is the case... what are the common 10 items which you are showcasing from Log analytics /per (tg://bot_command?command=per) tool from OMS with respect to your infra...(if you are Using the OMS full set)..

8:23:01 AM

Niraj Kumar

8:23:29 AM

Felipe

Once downloaded, not sure that the permission defined within...
Permission is only applied at access time when you try to download over internet. After downloaded it doesn't apply. It seems you have to do more study to understand Azure file storage.

Renjit Arvind

8:24:01 AM

Regarding ASR... if we failover to a DR site.... How to we fail
Both are possible. Fail over and failback

Renjit Arvind

8:29:22 AM

That's really great... if that is the case... what are the commo
I don't do engineering or operation so can't tell you. Only worked on integration with SCOM

Jeff Bezos overtakes Bill Gates as the world's richest man

Amazon CEO Jeff Bezos has overtaken Bill Gates to become the richest person in the world, with a net worth of \$90.6 billion. A surge in Amazon's shares on Thursday in anticipation of its earnings report propelled Bezos' fortune \$500 million past that of Gates. Microsoft Co-founder Bill Gates topped Forbes billionaires list for 18 of the past 23 years.

We have Opening for (Onsite) Infrastructure Project Lead (ITIL, Prince 2, Vmware, Exchange) - (12 -20 Yrs) in Oman

Skill : Infrastructure Project Lead (ITIL, Prince 2, Vmware, Exchange)

Exp : 12+ Yrs

Location : Oman

Notice period : Specify your Notice Period

Offer CTC : OMR/Month (Based on Experience)

If you are interested in this opening please send your updated profile with below details...

Tot Exp :

Relevant Exp :

Current CTC :

Expected CTC : OMR/Month (Based on Experience)

Notice period : Specify your Notice Period

Current Location

Detailed JD:

BE/BTech/Bachelor of Science in Computer Engineering discipline or equivalent

Minimum 12 years of experience in the IT Operation field (3-5 years experience in a similar role) & 6 years experience as a function lead with proven track record.

IT Infrastructure Library (ITIL Practitioner v3) and implementation experience;

Communication, mentoring and leadership skills;

Proven negotiation and organization skills;

Excellent presentation skills;

Project management skills and PRINCE2 practitioner certification

will be advantage.

A demonstrated focus on customer service excellence;

Experience developing and documenting desktop engineering and support processes and procedures;

Strong analytical and problem solving skills;

Strong organizational and planning skills;

Team player with excellent interpersonal skills;

Strong communication skills both written and verbal and excellent presentation skills.

Proven track record of Team lead experience;

Required Certifications: IT Infrastructure Library (ITIL Foundations v3);

Required Secondary Skills:

o Relevant Certifications: IT Intermediate v3 Service Transition, Control and Validation, Service Operation, Operational Support and Analysis, Microsoft Certified Solutions Expert (MCSE Desktop Infrastructure, MCSE Messaging), VMware Certified Professional (VCP), MCITP: Windows 7 Enterprise Desktop Support Technician, MCITP: Windows 7 Enterprise Desktop Administrator (MCITP).

2:08:58 PM

Shetty Nilesh

2:11:36 PM

2:11:46 PM

Has anyone seen this kind of errors when replicating a vm using ASR?

2:12:09 PM

this is for disk0 which means c: drive...rest all drives in the said server is protected just fine

2:13:01 PM

one thing i see is the c: drive is running low on disk space about 8 GB free out of 75+ GB...but cant find any other issues...

2:14:02 PM

Lalit Rawat

2:14:09 PM

Shetty Nilesh

this is for disk0 which means c: drive...rest all drives in the it can be issue with the bandwidth because error is clearly says it exceeding the threshold for disk 0

Shetty Nilesh

2:14:56 PM

u mean network bandwidth?

Lalit Rawat

2:15:07 PM

Shetty Nilesh

one thing i see is the c: drive is running low on disk space abo got the point nilesh bhai. that might be the region beacuse while proctating it took the space

yes

2:15:09 PM

Shetty Nilesh

2:15:54 PM

that cannot be the case as all other servers in the region and even rest of the disks in the same server is protected

no network spike or choke observed

2:16:10 PM

Lalit Rawat

2:16:11 PM

k

than check the disk space issue on this server or process server

2:16:25 PM

Shetty Nilesh

2:16:38 PM

i even restarted process servers

yes thats what remains like i said tue disk space is low on the said server...but other than that any idea?

2:17:28 PM

2:18:53 PM

Lalit Rawat

2:19:03 PM

even u can restart the mobility agent services of client system.

Shetty Nilesh

2:19:13 PM

thats done already

no luck

2:19:16 PM

strange thing is disks greater than the one mentioned on the same server are replicating fine

2:19:49 PM

Lalit Rawat

2:21:00 PM

can you free up the 20-25 gb disk in C drive and try ? it might help to fix the issue

Shetty Nilesh

2:21:11 PM

that error is seen on process server the one i pasted above...GetChecksum

yes thats the plan...but wanted to see if anyone has encountered same issue

2:21:36 PM

as its weird

2:21:40 PM

Lalit Rawat

2:22:43 PM

Shetty Nilesh

yes thats the plan...but wanted to see if anyone has encounte...
it came to me last time while doing this so tried those steps to fix , it got fixed, which you have alre dy tried .

let google it if i can found something els.

2:22:55 PM

Shetty Nilesh

2:23:06 PM

hmmm

thanks lalit...lets see what resolves my issue

2:23:24 PM

Lalit Rawat

2:24:28 PM

Shetty Nilesh

thanks lalit...lets see what resolves my issue

anything nilesh bhai.. hope this issue would resolve.

it's vmware or hyper V server ?

2:24:42 PM

Shetty Nilesh

2:24:50 PM

its vmware

Lalit Rawat

2:25:00 PM

k

Shetty Nilesh

2:25:34 PM

i even updated the mobility agent on the server just to be sure

Lalit Rawat

2:27:15 PM

Shetty Nilesh

i even updated the mobility agent on the server just to be sure

good , but it seems to look like error with hardware and can u check the process server and master server has enough space and communicating properly

Shetty Nilesh

2:27:56 PM

yeah...the only thing i see like i said is the low disk space on the client...

rest all is fine...

2:28:01 PM

Lalit Rawat

2:28:14 PM

k

Shetty Nilesh

2:28:24 PM

lets see i will try rebooting the process server and then free up some space on client

Lalit Rawat

2:28:49 PM

Shetty Nilesh

lets see i will try rebooting the process server and then free u sure

Niraj Kumar

4:54:37 PM

Dear Subscribers,

Thank you for showing interest in "AzureTalk-Learning Azure The Ezy Way"! It's an absolutely free 1-hour weekly recurring session to learn Azure! Following is agenda for this week.

- **Time & Date: July 29th, Saturday 8:00 AM EST, Saturday 5:30 PM IST**
- Place: Online Skype meeting.
<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>
(<https://meet.lync.com/kloudezy.com/azuretalk/MKRBB539>)
- Guest Speaker: **Lalit Rawat**
- Agenda: **Azure Networking- Azure DNS, Traffic Manager, Application Gateway, Load balancer.**

What is AzureTalk?

- Weekly recurring 1 hour session to cover wide array of topics on Microsoft Azure.
- Session has 3 parts
 - o 1st part I'll walk you through "Azure Concept Of The Week" by utilizing deck.
 - o 2nd part we do a live demo and implement what we discussed earlier.
 - o 3rd part Q & A session.
- These are live sessions and you will get an opportunity to ask questions. Make full use of time!
- Recorded sessions are published onto our AzureTalk Youtube channel.
- You could also join our Azure Talk Telegram Group for even better experience! Ask questions and get answers from the experts.
- You can refer all past Azure Talk here.

Thanks,

AzureTalk Team!

Niraj Kumar

9:18:21 AM

It's for **patching and configuration management**

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

9:18:37 AM

but you need some pre requirements

you need to have the CB on SCCM

9:18:57 AM

RA

Renjit Arvind

9:19:06 AM

Yes..it is only patching

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

9:19:28 AM

if you want to patching the servers, you dont the sccm

you can use the oms

edited 9:19:41 AM

Niraj Kumar

9:20:03 AM

Renjit Arvind

Yes..it is only patching

Yes you can do it. We have implemented it at our current organization

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

edited 9:20:34 AM

you can use the oms

Agree! You can use either SCCM or MOS configuration management

RA

Renjit Arvind

9:21:08 AM

Niraj... you did the cloud DP...of SCCM... correct... I stead of that

Can I use normal DP deployment?

9:21:36 AM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

9:22:21 AM

on OMS you have the option of Update Management that is to patching the server

Niraj Kumar

9:23:38 AM

Renjit Arvind

Niraj... you did the cloud DP...of SCCM... correct... I stead of Cloud! <https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/install-cloud-based-distribution-points-in-microsoft-azure> (https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/install-cloud-based-distribution-points-in-microsoft-azure)

Docs

Install cloud-based distribution points

([https://docs.microsoft.com/en-](https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/install-cloud-based-distribution-points-in-microsoft-azure)

[us/sccm/core/servers/deploy/configure/install-cloud-based-distribution-points-in-microsoft-azure](https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/install-cloud-based-distribution-points-in-microsoft-azure))

(<https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/install-cloud-based-distribution-points-in-microsoft-azure>)

Learn what you need to do to start using cloud-based distribution points in Microsoft Azure.

Docs

Update Management solution in OMS

(<https://docs.microsoft.com/en-us/azure/operations-management-suite/oms-solution-update-management>)

This article is intended to help you understand how to use this solution to manage updates for your Windows and Linux computers.

I personally would recommend oms

9:24:55 AM

The **Update Management solution in OMS** allows you to manage operating system security updates for your Windows and Linux computers deployed in Azure, on-premises environments, or other cloud providers. You can quickly assess the status of available updates on all agent computers and manage the process of installing required updates for servers.

9:26:06 AM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

9:27:35 AM

the advantage of SCCM is to deploy packages and create a personalize image of workstation and servers

on the oms you have less cost that the could DP

9:29:33 AM

why complicate if you can simplify the things

9:32:04 AM

?

9:32:07 AM

Niraj Kumar

9:32:51 AM

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

on the oms you have less cost that the could DP

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

9:34:19 AM

the azure all the things that you have, you have cost and they are not cheap

Niraj Kumar

9:34:28 AM

They may have existing SCCM infrastructure. Could you integrate OMS and SCCM??

Is there any way to get access Azure hyperv access??

Someone plz answer my question

Lalit Rawat

1:47:01 PM

Vivek Kumar Mishra

Is there any way to get access Azure hyperv access??

Azure dose not support hyper v on in vms but not sure.. if this is still there

Vivek Kumar Mishra

1:48:13 PM

Same here lalit as per knowledge it's no, but don't know is there any update or not

Lalit Rawat

1:48:44 PM

I don't see any update till now

Vivek Kumar Mishra

1:48:53 PM

Still facing issues with TMG severe

Not able to deploy in Azure

1:49:02 PM

Lalit Rawat

1:49:13 PM

Ohh ok..

Vivek Kumar Mishra

1:49:23 PM

Any ways

Someone expert in TMG forefront firewall??

1:50:23 PM

Niraj Kumar

2:13:00 PM

Vivek Kumar Mishra

Is there any way to get access Azure hyperv access??

No. Microsoft will not allow access. Instead run Azure stack

Naveen Kollipara

3:18:07 PM

You can now install hyper-v on some specific vm type and size.
This enables nested virtualization.

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:18:49 PM

Vm in azure is hyperv

Naveen Kollipara

3:18:50 PM

I dont think they will ever allow access to hyper-v that is running on the base hardware.

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:19:45 PM

You don't have access to the hardware

That because the azure is iaas

3:20:02 PM

Vivek Kumar Mishra

3:21:21 PM

Naveen Kollipara

I don't think they will ever allow access to hyper-v that is running
Yea that is possible

Naveen Kollipara

3:21:32 PM

Nuno not sure I understand what you are trying to say.

Vivek Kumar Mishra

3:21:59 PM

You use Azure nested virtualisation but some specific series of VM

Naveen Kollipara

3:21:59 PM

Vivek Kumar Mishra

Yea that is possible
I doubt it, but I would love to know if there is a way

Vivek Kumar Mishra

3:22:44 PM

But I don't have access of that series

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:22:46 PM

You don't have access to the hardware because the Azure is virtualization hardware

Vivek Kumar Mishra

3:22:59 PM

It's E series of VM

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:23:32 PM

You don't have access to the hardware because the Azure is virtualization hardware
Right but Azure support Nested virtualisation

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:24:09 PM

That's because the Windows Server 2016 support nested virtualization

Vivek Kumar Mishra

3:24:24 PM

How to setup Nested Virtualization in Microsoft Azure | Thomas Maurer

([http://www.thomasmaurer.ch/2017/07/how-to-setup-nested-virtualization-in-microsoft-azure/?utm_content=buffer5b6f4&utm_medium=social&utm_s](http://www.thomasmaurer.ch/2017/07/how-to-setup-nested-virtualization-in-microsoft-azure/?utm_content=buffer5b6f4&utm_medium=social&utm_source=twitter.com&utm_campaign=buffer))

At the Microsoft Build Conference this year, Microsoft announced Nested Virtualization for Azure Virtual Machines, and last week Microsoft announced t...

Naveen Kollipara

3:30:51 PM

My intuition is that Azure might offer complete isolated turnkey private cloud solutions in the future, maybe when Azure stack becomes more and more mature

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:31:49 PM

the objective of azure stack is to transfer the configuration that you have on azure to on premises

and fix

3:31:58 PM

and send to azure

3:32:02 PM

Vivek Kumar Mishra

3:32:29 PM

Azure stack is different and Azure nested virtualisation different

Naveen Kollipara

3:32:54 PM

Nuno thats an interesting perspective

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:34:41 PM

the nested virtualization is like containers

Vivek Kumar Mishra

3:34:50 PM

Nuno but I case of Azure nested virtualisation no need to connect on prim

You can create layers of vm above Azure Vm

3:35:28 PM

BL

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

3:36:26 PM

that features is used on windows server 2016

<https://docs.microsoft.com/en-us/virtualization/hyper-v-on-windows/user-guide/nested-virtualization>
(<https://docs.microsoft.com/en-us/virtualization/hyper-v-on-windows/user-guide/nested-virtualization>)

3:36:47 PM

Nested Virtualization (<https://docs.microsoft.com/en-us/virtualization/hyper-v-on-windows/user-guide/nested-virtualization>)

Vivek Kumar Mishra

3:37:57 PM

You can connect your hyperv

But not install hyperv

3:38:13 PM

And deploy your vm

3:38:26 PM

As for i know

3:38:42 PM

Vivek Kumar Mishra

3:39:22 PM

<https://channel9.msdn.com/Events/Build/2017/B8087>

But selecting this series you can deploy your cm

Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn

[https://www.thomasmaurer.ch/2017/07/how-to-setup-nested...](https://www.thomasmaurer.ch/2017/07/how-to-setup-nested-virtualization-in-microsoft-azure/)

Nuno I am not arguing with you but I'll try same today and trying to deploy new vm ruining hyperv on running Azure vm

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 3:42:28 PM
did you use the windows server 2016?

 **Vivek Kumar Mishra** 3:42:59 PM
Nope

It's like windows 10 3:43:09 PM

No severe fet 3:43:15 PM

 3:43:19 PM

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 3:43:19 PM
the nested virtualization is support on windows server 2016

 **Vivek Kumar Mishra** 3:43:29 PM
But today I'll try

Vivek Kumar Mishra 3:43:42 PM
No severe fet
Feeling

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 3:43:45 PM
on windows server 2012?

 **Vivek Kumar Mishra** 3:44:08 PM
Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn
on windows server 2012?
Yea

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 3:44:30 PM
on windows server 2012 the hyper-v is not supported

 **Vivek Kumar Mishra** 3:44:30 PM
Yea giving me options to connect to hyperv server

But not supported nested virtualisation 3:44:54 PM

I tried with hyperv, vmware and oracle virtualisation 3:45:34 PM

Virtualbox 3:46:04 PM

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 3:46:44 PM

Hi friends - can you suggest if TXT record is required one time
It will be onetime verification.

VN **Vijay Nagpal** 4:07:33 PM
Lalit Rawat
It will be onetime verification.
Thanks..I have split DNS zone (Public and Internal zone) for my domain...I have to create one txt record in my domain for one vendor for verification purpose..do I need to create txt record just in public DNS or in internal DNS zone as well ?

BL **Be passionate and bold. Always keep learning. You stop doing useful things if you don't learn** 4:09:14 PM
The best solution is create a separate dns is to not communicate external with internal

VN **Vijay Nagpal** 4:12:16 PM
Separate DNS ?

Niraj Kumar 4:27:05 PM
Vijay Nagpal
Thanks..I have split DNS zone (Public and Internal zone) for my
Hi Vijay! We need to understand why we create TXT record. The domain that you have on public domain needs to have ownership confirmed before Microsoft lets you use it because it's in public domain, however in case of Private DNS zone Microsoft doesn't have any concern. So if you read it carefully you will get the answer.

TXT record is only needed to confirm the Domain ownership of Public DNS zone and not Private DNS zone 4:27:47 PM

CLOUD WARS

Top 10 Rankings – June 5, 2017

1.	Microsoft – Brilliant integration of cutting-edge services across “digital estate”
2 (tie).	AWS – IaaS powerhouse eyes Oracle database workloads to grow in PaaS
2 (tie).	Salesforce – Benioff making major pushes into vertical markets and AI
4.	SAP – McDermott has transformed stodgy apps king into powerful cloud force
5.	IBM – Rometty dealt bad hand, making IBM & Watson cloud-cognitive innovator
6.	Google – If Oracle moves up to #6, it's because Google is just too cool to care
7.	Oracle – Larry Ellison's overhauled products, now time to overhaul Mark Hurd
8.	Workday – Looking to crack \$2B revenue, <u>Bhusri</u> needs Financial apps to soar
9.	ServiceNow – high-growth company w/disruptive approach and cool new CEO
10.	VMware – great potential, but must clearly define why customers should care

Any book on 70-534?

1:38:05 AM

Vijay

Hello All.

As I have already mentioned , I am a MCT having training experience of 18 years , specialized in Azure, SCCM, Exchange server, Windows Server , CEH, PMP, ITIL, VCP, RHCA. Trained top MNCs in India, UK, UAE, Qatar, Cambodia, Singapore, Thailand.

Had a discussion with Niraj, will like to have a session on Skype for becoming a MCT and benefits of MCT.

Kindly suggest the time on Saturday if more people can join.

At the same time starting a batch on second Saturday of this month online for Azure 70-533.

Please feel free to contact for both.
